

Numatic HepaFlo Filter Dust Bags – Pack of 10

Variant code: 16-NVM1CH

Numatic HepaFlo Filter Dust Bags are **high-efficiency vacuum cleaner dust bags** designed to provide superior dust containment, filtration performance and hygienic disposal for a wide range of Numatic vacuum cleaners. Manufactured using Numatic's advanced HepaFlo filtration technology, these genuine replacement dust bags help maintain optimum vacuum performance while reducing exposure to dust and airborne particles during emptying.

Unlike traditional paper dust bags, HepaFlo bags are engineered from durable filtration material that maximises airflow while effectively retaining dust, dirt and fine particles. The self-sealing design helps prevent dust from escaping during bag removal, providing a cleaner and more hygienic disposal process for operators and cleaning staff.

Designed to maintain strong suction performance throughout the bag's working life, HepaFlo bags help improve vacuum efficiency while protecting internal machine components from dust contamination. Their durable construction also reduces the risk of splitting or tearing during use and disposal.

Supplied as a **pack of 10**, these genuine Numatic dust bags provide a convenient stock of replacements suitable for numerous Numatic commercial, industrial and domestic vacuum cleaners. Ideal for professional cleaning contractors, facilities managers and maintenance teams, HepaFlo bags help ensure consistent cleaning performance and high standards of hygiene.

Product Features

- Genuine Numatic HepaFlo dust bags
- Advanced high-efficiency filtration technology
- Self-sealing design for hygienic disposal
- Durable multi-layer construction
- Maintains strong vacuum airflow and suction
- Helps contain fine dust and debris
- Easy installation and replacement
- Supplied in a **pack of 10**

Product Benefits

- **Provides cleaner and more hygienic dust disposal**
- **Helps maintain optimum vacuum performance**
- **Improves dust containment during bag changes**
- Supports cleaner indoor environments
- Reduces exposure to collected dust and allergens
- Durable design helps prevent bag damage
- Suitable for demanding commercial cleaning applications
- Genuine compatibility ensures reliable performance

Technical Characteristics

- Product Type: Vacuum Cleaner Dust Bags
- Filtration Type: HepaFlo High-Efficiency Filtration
- Quantity: Pack of 10
- Installation: Quick and Easy Replacement
- Self-Sealing Dust Retention System
- Genuine Numatic Accessory
- Suitable for Commercial and Domestic Use
- Designed for Long-Lasting Performance

Compatible Numatic Models

Suitable for use with the following Numatic vacuum cleaners:

- NV200, NNV200, NNV204
- NVH180, NVH200
- NVP180, NVP200
- NSP180A, NSP200A
- PSP180A, PSP200A
- VNR200, NSR200A
- NVR200, NVR204, NRV200, NRV204, NRV200T
- PVR200A, PVT220A, NST220A
- NVQ200, NVQ202, NVQ204, NVQ200T
- NVQ250, NVQ250B, NVQ252, NVQ254, NVQ250T
- NQS200, NQS200T
- AVQ250, MFQ300
- RSV130, RSV130M, RSV130P, RSV134, RSV134P, RSV130T
- RSAV130, RSV200, RSV200P, RSV200M, RSV204, RSV204P, RSV200T, RSAV200
- HZQ200, HZQ250
- Dustrol NB200

- JVH180, JVP180A
- HVR200, HVR200A, HVR200P, HVR200M, HVR204, HVR204P, HVR200T
- HVX200, HVX200A
- HHR200
- HET200, HET200A

Applications

Numatic HepaFlo Filter Dust Bags are ideal for **commercial cleaning contractors, offices, schools, healthcare facilities, hospitality venues, retail stores, workshops, warehouses and domestic environments**. Suitable for collecting **dust, dirt, debris and fine particles**, they provide efficient filtration, hygienic disposal and reliable vacuum performance across a wide range of Numatic vacuum cleaner models.
