Numatic Hose Connector - Machine End - 38mm

Variant code: 16-HE64

Numatic Replacement Hose End Connectors are genuine-style replacement fittings designed to restore or repair compatible Numatic vacuum hoses. Available in both **Tool End** and **Machine End** configurations, with **32mm and 38mm** diameter options, these durable hose ends provide a secure connection between the vacuum hose, cleaning tools and machine, ensuring reliable airflow and optimum cleaning performance.

Manufactured from robust, impact-resistant materials, these replacement connectors are designed to withstand the demands of everyday commercial cleaning. Whether replacing a worn, cracked or damaged hose end, they provide a cost-effective way to extend the service life of your existing vacuum hose without replacing the complete assembly.

Simple to install, the hose ends offer a secure fit for compatible Numatic vacuum systems, helping maintain efficient suction and dependable machine operation across a wide range of professional cleaning applications.

Product Features

- Replacement hose end connectors for Numatic vacuum hoses
- Available as Tool End or Machine End fittings
- Available in 32mm and 38mm diameters
- Durable impact-resistant construction
- Provides a secure hose connection
- Maintains efficient airflow and suction performance
- Quick and easy to install
- Suitable for commercial vacuum cleaning equipment

Product Benefits

- **Extends the service life of existing vacuum hoses**
- **Restores secure hose connections and optimum suction performance**
- **Cost-effective alternative to replacing**
