Numatic NVM2BH Hepaflo Dust Bags: For 350/370

Variant code: 16-NVM2BH

Numatic NVM-2BH HepaFlo Dust Bags are genuine high-efficiency replacement filter bags designed for compatible Numatic commercial vacuum cleaners. Featuring advanced HepaFlo filtration technology, these professional dust bags provide superior dust containment, improved airflow and hygienic disposal, helping maintain optimum vacuum performance while protecting indoor air quality.

Manufactured to Numatic's exacting standards, NVM-2BH HepaFlo bags are engineered to capture fine dust and debris while maintaining strong airflow throughout the cleaning process. The innovative self-sealing design locks dust safely inside the bag during removal, reducing exposure to collected contaminants and improving hygiene for operators. Compared with traditional paper bags, HepaFlo bags offer increased capacity, improved filtration performance and greater resistance to tearing, making them ideal for demanding commercial cleaning environments.

Designed specifically for Numatic 350 and 370 series vacuum cleaners, these genuine replacement bags help maximise suction performance and extend machine lifespan. Easy to install and dispose of, they provide a reliable and convenient solution for maintaining professional cleaning standards across a wide range of industries.

Product Features

- **Genuine Numatic HepaFlo filter bags**
- Advanced high-efficiency dust filtration technology
- Self-sealing collar for hygienic disposal
- Improved airflow and vacuum performance
- Higher dust retention compared to standard paper bags
- Durable construction for commercial use
- Designed for Numatic 350 and 370 series machines

Product Benefits

- Maintains optimum vacuum suction

performance
- Improves dust containment and air quality
- Reduces operator exposure during bag replacement
- Helps extend vacuum cleaner lifespan
- Provides cleaner and more hygienic disposal
- Offers greater durability than traditional paper bags
- Ensures compatibility and reliability with Numatic equipment

Technical Characteristics

- Model: **NVM-2BH HepaFlo**
- High-efficiency filter bag technology
- Self-sealing hygienic closure system
- Commercial-grade dust collection performance
- Genuine Numatic replacement consumable
- Designed for 350 and 370 series vacuum cleaners

Applications

Numatic NVM-2BH HepaFlo Dust Bags are suitable for use with compatible Numatic vacuum cleaners including **HZ370, WV370, WV380, GVE370, CVC370, NVQ370, NVQ380, MFQ370 and PPH320**. Ideal for cleaning contractors, healthcare facilities, schools, offices, hospitality venues, industrial sites and commercial cleaning environments where reliable dust containment and high filtration performance are essential.
