Numatic NVM4BH Hepaflo Dust Bags: For 750/900 Machines

Variant code: 16-NVM4BH

Numatic NVM-4BH HepaFlo Dust Bags are **high-capacity replacement dust bags** designed specifically for selected **Numatic 750 and 900 series vacuum cleaners**. Manufactured using Numatic's advanced HepaFlo filtration technology, these genuine replacement bags provide superior dust retention, improved airflow and hygienic disposal, helping to maintain optimum vacuum performance in demanding commercial and industrial cleaning environments.

Unlike conventional paper bags, HepaFlo dust bags are constructed from durable filtration material that improves airflow while effectively capturing dust, dirt and fine particles. The self-sealing design helps prevent dust from escaping during bag changes, providing a cleaner and more hygienic disposal process for operators.

Designed for large-capacity vacuum cleaners, the NVM-4BH bags support efficient debris collection while helping protect vacuum motors and internal components from dust contamination. Their robust construction reduces the risk of tearing and splitting, making them ideal for heavy-duty cleaning applications.

Supplied in a convenient **pack of 10**, these genuine Numatic replacement bags provide a cost-effective solution for maintaining machine performance and ensuring continuous cleaning productivity in professional environments.

Product Features

- Genuine Numatic NVM-4BH HepaFlo dust bags
- Advanced high-efficiency HepaFlo filtration
- Designed for Numatic 750 and 900 series machines
- Self-sealing collar for hygienic disposal
- Durable multi-layer bag construction
- Maintains strong airflow and suction performance
- Easy installation and replacement
- Supplied in a **pack of 10**

Product Benefits

- **Provides cleaner and more hygienic dust disposal**
- **Maintains optimum vacuum cleaner performance**
- **Improves dust containment during bag replacement**
- Helps reduce exposure to airborne dust particles
- Supports efficient commercial cleaning operations
- Durable design helps prevent bag damage
- Suitable for demanding industrial environments
- Genuine compatibility ensures reliable performance

Technical Characteristics

- Product Type: Vacuum Cleaner Dust Bags
- Model: NVM-4BH
- Filtration Type: HepaFlo High-Efficiency Filtration
- Quantity: Pack of 10
- Self-Sealing Dust Retention System
- Genuine Numatic Accessory
- High-Capacity Dust Collection
- Commercial and Industrial Grade Performance

Applications

Numatic NVM-4BH HepaFlo Dust Bags are ideal for **commercial cleaning contractors, industrial facilities, warehouses, workshops, manufacturing environments, schools, healthcare facilities and public buildings** where high-capacity vacuum cleaners are used. Suitable for collecting **dust, dirt, debris and fine particles**, these bags provide efficient filtration, hygienic disposal and reliable vacuum performance for professional cleaning applications.
