Numatic PadLoc Drive Board - 500mm

Variant code: 16-606403

Numatic PadLoc Drive Board is a professional floor pad holder designed for use with compatible Numatic rotary machines, scrubber dryers and floor maintenance equipment. Engineered to securely retain floor pads during operation, this genuine Numatic accessory delivers reliable performance for scrubbing, polishing, buffing and routine floor maintenance applications.

Featuring Numatic's proven **PadLoc fixing system**, the drive board ensures floor pads remain firmly attached throughout operation, providing consistent pad contact and maximising cleaning efficiency. The robust construction is designed to withstand the demands of commercial and industrial cleaning environments, while the secure pad retention system helps improve machine performance across a variety of floor care tasks. Suitable for use with a range of floor pads, the PadLoc Drive Board offers excellent versatility for different cleaning and floor restoration applications.

Easy to install and remove, the drive board allows operators to quickly change pads between tasks, helping to improve productivity and reduce downtime. Whether used for daily maintenance cleaning or specialist floor polishing, the Numatic PadLoc Drive Board is an essential accessory for achieving professional floor care results.
