# Numatic Porcupine Drive Board - 360mm

**Variant code: 16-606626**

**Numatic Porcupine Pad Drive Board** is a **professional pad driver** designed for use with compatible **Numatic rotary floor machines**. Featuring a **360mm working diameter**, this durable drive board securely holds floor pads in place using its integrated **porcupine-style grip face**, making it ideal for a wide range of floor cleaning, scrubbing, polishing and maintenance applications.

Manufactured from heavy-duty materials, the drive board provides excellent strength and durability for demanding commercial use. The robust porcupine grip securely retains floor pads during operation, ensuring consistent pad contact and reliable power transfer for maximum cleaning performance. Suitable for use with a variety of floor pads, it offers the flexibility to tackle everything from routine cleaning and spray maintenance to polishing and floor preparation.

Designed as a direct replacement accessory, the drive board is quick and easy to fit, allowing rapid pad changes with minimal downtime. Its durable construction ensures long service life, helping maintain the efficiency and productivity of your Numatic rotary floor machine.

Ideal for professional floor care, the Numatic Porcupine Pad Drive Board provides reliable performance across a wide range of hard floor maintenance tasks.

## Product Features

- **360mm porcupine pad drive board**
- Designed for compatible Numatic rotary floor machines
- Integrated porcupine grip securely holds floor pads
- Suitable for scrubbing, cleaning and polishing pads
- Heavy-duty commercial construction
- Provides consistent pad contact
