

Numatic PPT220 9 Litre Tub Vacuum Cleaner with Trolley 240V

Variant code: 16-PPT220A

The Numatic PPT Commercial Vacuum Cleaner is an innovative, all-in-one cleaning solution designed to improve efficiency for cleaning teams working across busy sites. Combining powerful vacuum performance with integrated storage, it allows operatives to carry all essential cleaning tools and supplies in one convenient unit.

Featuring a lift-off storage caddy, the PPT enables cleaners to transport cloths, chemicals and accessories alongside their vacuum, reducing the need for multiple trips and increasing productivity. For even greater flexibility, an additional colour-coded caddy (red, blue, green or yellow) can be added to support task-specific or zone cleaning.

Built for demanding commercial environments, the PPT is equipped with large rear wheels and a telescopic pull handle, making it easy to manoeuvre across sites and transport on stairs. On-board storage keeps tools close to hand, ensuring everything needed for the job is always within reach.

With a large 9L capacity and high-efficiency HepaFlo filtration, this vacuum allows teams to clean for longer with fewer interruptions. The triple-layer filter bags ensure hygienic, dust-free emptying, supporting safer cleaning practices.

Designed with durability and ease of maintenance in mind, the NuCable system allows for quick and simple cable replacement, helping to reduce downtime and extend product life.

Supplied with the professional ASO accessory kit and stainless steel tube set, the PPT is ready to tackle a wide range of cleaning tasks straight out of the box.

Key features

- Integrated lift-off storage caddy for cleaning essentials
- Optional second colour-coded caddy for task or zone cleaning
- Large 9L capacity for longer cleaning cycles

- High-efficiency HepaFlo filtration for hygienic emptying
- NuCable system for fast and easy cable replacement
- Large rear wheels and telescopic handle for easy transport
- On-board tool storage keeps equipment organised and accessible
- Supplied with professional ASO accessory kit and stainless steel tube set

Why choose the Numatic PPT?

The Numatic PPT is designed to streamline cleaning operations by combining cleaning power with practical storage. It reduces downtime, improves organisation and helps teams work more efficiently across multiple areas.

Applications

Suitable for:

- Contract cleaning teams
- Facilities management across multi-site environments
- Offices and commercial buildings
- Schools, colleges and universities
- Healthcare environments
- Leisure and hospitality venues
