

Numatic Primary Filtrex Red & White Filter Pack – 356mm Machine

Variant code: 16-604138

Numatic Primary Filtrex Red & White Filter Pack is a **genuine two-stage filtration system** designed for compatible **356mm Numatic machines**. Engineered to provide effective dust separation and filtration performance, this complete filter pack helps maintain optimum airflow, protect internal machine components and ensure reliable cleaning efficiency in commercial and industrial environments.

The two-stage filtration design combines both **red and white Filtrex filters** to capture dust, debris and fine particles before they reach the vacuum motor. This helps improve filtration performance, maintain strong suction and extend the operational life of the machine by reducing the build-up of dust within internal components.

Designed as a complete replacement filter set, the Primary Filtrex Filter Pack restores filtration efficiency and helps maintain the high performance standards expected from Numatic equipment. Its durable construction ensures reliable operation under demanding cleaning conditions and supports consistent airflow throughout the cleaning process.

As a genuine Numatic accessory, the filter pack offers perfect compatibility with suitable 356mm machines, making it an essential maintenance component for professional cleaning operations.

Product Features

- Genuine Numatic Primary Filtrex filter pack
- Complete two-stage filtration system
- Includes red and white Filtrex filters
- Designed for compatible 356mm machines
- Helps maintain optimum airflow
- Supports efficient dust and debris filtration
- Durable and long-lasting construction
- Easy replacement and installation

Product Benefits

- **Improves filtration efficiency and dust retention**
- **Helps maintain strong vacuum performance**
- **Protects internal machine components from dust contamination**
- Supports longer machine service life
- Restores optimum airflow and suction
- Reduces maintenance requirements
- Genuine compatibility ensures reliable operation
- Ideal for routine machine servicing

Technical Characteristics

- Product Type: Filter Pack
- Filtration System: Two-Stage Filtrex Filtration
- Filter Colours: Red & White
- Compatibility: 356mm Numatic Machines
- Application: Dust Filtration and Motor Protection
- Genuine Numatic Accessory
- Complete Replacement Filter Set
- Commercial-Grade Construction

Applications

Numatic Primary Filtrex Red & White Filter Pack is ideal for **commercial cleaning contractors, industrial facilities, workshops, warehouses, schools, healthcare facilities and public buildings** operating compatible **356mm Numatic machines**. Suitable for maintaining efficient dust filtration and protecting machine components, it helps ensure reliable cleaning performance and supports routine equipment maintenance programmes.
