Numatic Quick Dust Bag Pods - Pack of 10

Variant code: 16-915145

Numatic Quick Pods are **high-efficiency dust collection pods** designed specifically for use with the **Numatic Quick Battery Powered Stick Vacuum Cleaner**. Developed as part of Numatic's innovative pod-based filtration system, these replacement pods provide hygienic, dust-free waste disposal while helping maintain the vacuum's cleaning performance and filtration efficiency.

Unlike traditional bagless vacuum systems that can release dust back into the air during emptying, Numatic Quick Pods securely contain collected dirt, dust and debris within a sealed pod. Once full, the pod can be removed and disposed of quickly and cleanly, minimising user contact with dust and helping to maintain a healthier indoor environment.

Each pod incorporates high-efficiency filtration technology to capture fine dust particles while supporting optimum airflow and suction performance. The sealed design helps reduce the risk of dust exposure, making the Quick system particularly suitable for environments where cleanliness and hygiene are important.

Supplied in a convenient **pack of 10**, these genuine Numatic replacement pods ensure your Quick Vacuum Cleaner remains ready for use while maintaining the performance, convenience and hygienic operation for which the Numatic Quick system is known.

Product Features

- Genuine Numatic replacement dust collection pods
- Designed specifically for the Numatic Quick Vacuum Cleaner
- Hygienic sealed pod disposal system
- High-efficiency dust filtration
- Supports optimum vacuum performance
- Quick and easy pod replacement
- Helps contain dust during disposal
- Supplied in a **pack of 10**

Product Benefits

- **Provides hygienic, dust-free emptying**
