Numatic Twintec TT4055G - 240V Mains Powered Scrubber Dryer - 550mm

Variant code: 16-TT4055G

Numatic Twintec TT4055G is a high-capacity **mains powered scrubber dryer** engineered to deliver exceptional cleaning performance across large commercial and industrial environments. Combining a generous **40-litre capacity** with a wide **550mm scrubbing width**, the TT4055G provides the productivity, durability and cleaning power required for demanding floor maintenance programmes.

The key advantage of the TT4055G lies in its mains-powered operation, providing continuous cleaning performance with significantly greater power than many battery-operated alternatives. This makes the machine particularly effective on rough, heavily soiled and high-traffic floor surfaces where maximum scrubbing performance is essential. Equipped with durable Polyform tanks and a powerful **TwinFlo vacuum motor**, the machine delivers excellent water recovery, leaving floors clean, dry and safe for immediate use. Its large cleaning path and **150rpm brush speed** help maximise productivity while maintaining consistent cleaning standards.

Designed for operator comfort and long-term reliability, the TT4055G incorporates simple controls, a fully adjustable handle and the convenient FlexiFill filling system. The robust **Structofoam chassis** is built to withstand years of industrial use, while support through the **Nu-Assist App** provides operators with instant access to guidance, maintenance information and troubleshooting support. Supplied complete with brush, the TT4055G is a dependable solution for organisations requiring powerful, uninterrupted floor cleaning performance.

Product Features

- **550mm scrubbing width** for high-productivity cleaning
- **40-litre capacity** supports extended cleaning sessions
- Mains powered operation delivers continuous cleaning performance
- **TwinFlo vacuum motor** provides

powerful water recovery
- Heavy-duty **Structofoam chassis** for industrial durability
- Fully adjustable handle and convenient FlexiFill system
- Compatible with the **Nu-Assist App** for operator support

Product Benefits

- Provides exceptional cleaning power for heavily soiled floors
- Eliminates battery charging downtime during operation
- Improves productivity across large floor areas
- Leaves floors clean, dry and safe for immediate use
- Enhances operator comfort through ergonomic controls
- Delivers long-term reliability in demanding environments
- Supports consistent professional cleaning standards

Technical Characteristics

- Professional **240V mains powered scrubber dryer**
- **550mm cleaning width**
- **40 litre solution and recovery tank capacity**
- **150rpm brush speed**
- Heavy-duty Polyform tanks and TwinFlo vacuum system
- Compatible with cable extensions up to 40m without performance loss
- Supplied complete with brush

Applications

Numatic Twintec TT4055G is ideal for warehouses, factories, workshops, distribution centres, manufacturing facilities, educational buildings, retail environments and other large commercial premises where powerful and continuous floor cleaning is required. Its wide cleaning path, large-capacity tanks and mains-powered operation make it particularly suitable for rough, heavily soiled and industrial floor surfaces where maximum cleaning performance and operational efficiency are essential.
