Numatic Union Mix Polishing Brush - 400mm

Variant code: 16-606102

Numatic Union Mix Polishing Brush is a **professional floor polishing brush** designed for use with compatible **Numatic rotary floor machines**. With a **400mm working width**, this high-quality brush features a **union mix of natural and synthetic fibres**, providing the ideal balance of gentle polishing performance and durability for maintaining hard floor finishes.

Engineered for routine polishing and buffing, the union mix bristles effectively enhance floor shine while lifting light surface dirt and dust without damaging delicate floor coatings. The combination of natural and synthetic fibres delivers smooth, even contact with the floor, making it suitable for regular maintenance of polished and protected hard floor surfaces.

Manufactured for long service life, the brush is designed to withstand the demands of commercial floor care while maintaining consistent polishing performance. It installs quickly onto compatible Numatic rotary machines, making routine brush changes fast and efficient with minimal downtime.

Ideal for professional floor maintenance, the Numatic Union Mix Polishing Brush helps restore and maintain an attractive, high-quality finish across a wide range of commercial hard floors.
