

Numatic Union Mix Polishing Brush – 450mm

Variant code: 16-606202

Numatic Union Mix Polishing Brush is a professional floor polishing brush designed for use with compatible **Numatic rotary floor machines**. Featuring a **450mm working width**, this high-quality brush combines **natural and synthetic union mix bristles** to deliver excellent polishing performance while maintaining the appearance and protection of hard floor finishes.

Engineered for routine polishing and buffing, the union mix bristles provide the ideal balance of softness and durability, effectively removing light surface dirt and dust while enhancing the shine of polished floors. The carefully blended fibre construction ensures even floor contact, producing a consistent finish without damaging delicate floor coatings.

Manufactured for demanding commercial environments, the brush offers long-lasting performance and excellent wear resistance, making it ideal for regular floor maintenance. Designed as a direct replacement accessory, it fits compatible Numatic rotary machines quickly and securely, minimising downtime during routine brush changes.

Ideal for professional cleaning contractors and facilities management teams, the Numatic Union Mix Polishing Brush helps maintain attractive, high-gloss hard floors with reliable, consistent results.

Product Features

- **450mm union mix polishing brush**
- Combination of natural and synthetic bristles
- Designed for polishing and buffing hard floors
- Provides smooth, even floor contact
- Durable commercial-grade construction
- Suitable for routine floor maintenance
