

Numatic WV370 – Wet & Dry Tub Vacuum Cleaner 110V

Variant code: 16-WV370-2/110V

The WV-370's are, by design, wet or dry vacuum cleaners that perform totally without compromise in either mode. We know full well that when you want to operate as a dry machine performance must be as good as a dry-only machine, with big filters and the option of giant HepaFlo disposable dust bags ensuring a high standard of operation. Similarly, when required for wet work, a quick switch of the dry filter for the wet float valve and a change of floor nozzle will give you equally professional performance and a clean, dry floor at the end of it all. The machine is to our full TwinFlo' performance specification ensuring exceptional results.
