# Microfibre Glass Cleaning Cloth

**Variant code: 12-665**

**Glass Cleaning Microfibre Cloth** is a high-performance lint-free cleaning cloth designed to deliver streak-free polishing and crystal-clear results on glass and reflective surfaces. Manufactured from a premium microfibre blend, this professional cleaning cloth effectively captures dirt, fingerprints, dust and grime while providing superior absorbency and polishing performance.

Engineered for professional cleaners, janitorial teams and facilities management environments, the ultra-fine microfibre construction lifts and traps particles without smearing or leaving lint behind. The advanced woven structure delivers smooth and even wiping action, making it ideal for windows, mirrors, glass doors, display cabinets, stainless steel and polished surfaces. Its exceptional absorbency supports fast and efficient cleaning with or without glass cleaning chemicals.

Designed for long-term professional use, this durable microfibre cloth is machine washable and maintains its cleaning performance through repeated laundering. The grey colour supports professional colour-coded hygiene systems and helps prevent cross-contamination in commercial cleaning environments.

## Product Features

- **Professional glass cleaning microfibre cloth**
- Premium ultra-fine microfibre blend construction
- Streak-free and lint-free cleaning performance
- Highly absorbent for efficient glass cleaning
- Safe non-abrasive cloth for delicate surfaces
- Machine washable and reusable design
- Grey colour supports hygiene colour-coding systems
- **Suitable for commercial and domestic use**

## Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Delivers crystal-clear streak-free glass cleaning
- Effectively removes fingerprints, dust and grime
- Reduces the need for excessive polishing and rewiping
- Highly absorbent material improves cleaning efficiency
- Lint-free finish suitable for polished surfaces
- Reusable construction offers long-term value
- Supports hygienic professional cleaning operations

## Technical Characteristics

- **High-quality microfibre blend material**
- Soft lint-free woven cloth construction
- Non-abrasive cleaning surface
- Machine washable for repeated professional use
- Suitable for wet and dry cleaning applications
- Professional commercial cleaning compatible
- Approximate professional size: 40cm x 40cm
- **Colour: Grey**

## Applications

**Glass Cleaning Microfibre Cloth** is ideal for contract cleaning companies, facilities management teams, hospitality venues, offices, retail environments and domestic cleaning applications requiring streak-free glass and surface polishing. It is particularly suitable for windows, mirrors, glass partitions, stainless steel, display cabinets and other reflective surfaces.
