AED Outdoor Heated Wall Cabinet for Defibrillator

Variant code: 21-95606

This Outdoor Heated AED Wall Cabinet ensures you can keep your defibrillator safe and secure. It has a built in mechanical keypad with a permanent blue LED light. This light enables you to access the AED with your chosen numeric combination.

In addition, this AED wall cabinet has a Digital
Temperature and Thermostat Display, along with an integrated alarm with remote control.

Outdoor Heated AED Wall Cabinet suitable for the safe storage of your defibrillator.

The cabinet itself is manufactured from thick, carbon steel with the addition of a shatterproof, transparent window. In addition, some extra features include a waterproof seal, user regulated temperature setting and a magnetic LED light which is operated when the door opens.

Components

- Mechanical keypad
- Alarm (120DB)
- Heating system
- Thermostat
- Magnetic LED Light
