Cobi 18 Robotic Scrubber Dryer

Variant code: 16-COBI

Cobi 18 Robotic Scrubber Dryer is an autonomous hard floor cleaning machine designed to deliver intelligent, consistent and efficient scrubbing performance in commercial environments. Compact, nimble and purpose-built for hard flooring, the Cobi 18 combines robotic navigation, efficient water use and close-to-edge cleaning to help reduce manual labour and improve cleaning consistency across busy facilities.

Designed with an 18.8 inch / 48cm cleaning path, the Cobi 18 is ideal for tighter spaces where larger scrubber dryers may be difficult to manoeuvre. Its compact footprint allows it to navigate congested areas, while side brushes extend beyond the machine perimeter to clean closer to edges and reduce the need for detailed follow-up cleaning. The machine also includes a squeegee system and optional dry mop attachment to help leave floors dry and ready for use after cleaning.

The advanced navigation system safely scans the surrounding environment and reacts quickly to people, furniture and structures. It has been developed to operate reliably around reflective surfaces such as mirrors and windows, making it suitable for modern commercial interiors. With its user-friendly interface, lithium-ion battery technology and intelligent i-Synergy system, the Cobi 18 supports data-driven cleaning routines and efficient floorcare management.

With one charge and one tank fill, the Cobi 18 can deliver up to 90 to 120 minutes of scrubbing, supporting projected productivity of up to 800m² per hour. Its easy-to-maintain dual tank system simplifies emptying, cleaning and refilling, while the integrated hopper and side brushes help collect light debris during operation.

Product Features

- **Autonomous robotic scrubber dryer for hard floors**
- Compact design for tight and congested spaces

Email: info@aukhygiene.com

- 48cm cleaning path for efficient floor coverage
- Side brushes support close-to-edge cleaning
- Advanced navigation system for safe operation
- Operates around mirrors and windows without issue
- Dual tank system for easy emptying, cleaning and refilling
- Includes squeegee with optional dry mop attachment

Product Benefits

- Reduces manual cleaning labour and improves productivity
- Helps deliver consistent cleaning results across hard floors
- Minimises detail work by cleaning close to edges
- Improves safety by scanning and reacting to surroundings
- Leaves floors cleaner, drier and ready for use
- Supports intelligent, data-driven cleaning management
- Simple daily maintenance reduces operator downtime

Technical Characteristics

- **18.8 inch / 48cm cleaning path**
- 90 to 120 minutes scrubbing runtime per charge and fill
- Projected productivity rate of up to 800m² per hour
- 1.5 to 2 hours operating time
- Approximate 3 hour battery charge time
- Lithium-ion battery technology
- Advanced autonomous navigation system
- GDPR compliant data protection design

Applications

Cobi 18 Robotic Scrubber Dryer is ideal for commercial buildings, offices, healthcare facilities, schools, retail environments, hospitality venues, transport hubs and facilities management operations requiring efficient autonomous cleaning of hard floor surfaces. Its compact size, intelligent navigation and close-to-edge cleaning capability make it particularly suitable for busy public areas, corridors, reception spaces and environments with furniture, fixtures or narrow
