

Compostable Round Plates – 179mm – Pack of 50

Variant code: 14-CW905

Make your food-to-go service a more environmentally friendly one with these 179(Ø)mm Fiesta Green compostable bagasse plates. As they're made from recycled sugarcane, these plates can be commercially composted within 12 weeks after use. This will help you to divert waste away from harmful landfill sites, instead turning the plates into nutrient-rich compost that's used to grow plants.

As bagasse is made from a renewable, natural waste product, these plates are kinder to Earth's finite resources than standard polystyrene packaging too. So even if you can't compost them, switching to these bagasse plates will still help you to reduce your environmental impact.

But that's not all. This bagasse material makes the plates safe for microwaves, ovens and freezers – so you've got plenty of choice when it comes to preserving, storing and heating up your food. And because bagasse is a highly breathable material that doesn't trap condensation, your food will stay deliciously crispy for longer with these plates.

Product features

- Dimensions 179(Ø)mm
- Material Bagasse
- Weight 10g
- Colour White
- The renewable, recycled bagasse material is incredibly kind to Earth's natural resources
