Fimap Adjusting Knob for IMX Scrub Deck

Variant code: 16-416158

Fimap Adjusting Knob is a **genuine replacement control component** designed specifically for **Fimap IMX scrubber dryers**. Engineered to provide precise adjustment of the scrub deck position and brush pressure settings, this essential part helps operators optimise cleaning performance across a wide range of floor surfaces and cleaning applications.

Accurate scrub deck adjustment is critical for achieving maximum cleaning efficiency. This genuine Fimap knob allows operators to fine-tune brush pressure and deck positioning, helping improve dirt removal, reduce streaking and ensure consistent cleaning results. Proper adjustment also helps minimise unnecessary brush wear and reduces stress on key machine components.

Manufactured to Fimap's exacting standards, the adjusting knob is built from durable materials to withstand demanding commercial and industrial cleaning environments. Easy to install and designed for reliable long-term performance, it helps keep your Fimap IMX scrubber dryer operating at peak efficiency.

Product Features

- Genuine Fimap scrub deck adjusting knob
- Designed for Fimap IMX scrubber dryers
- Provides precise scrub deck adjustment
- Helps control brush pressure settings
- Supports optimum cleaning performance
- Durable commercial-grade construction
- Easy to install and replace
- Designed for long-term reliable operation

Product Benefits

- **Allows precise adjustment of scrub deck performance**
- **Helps maximise cleaning efficiency and productivity**
- **Reduces unnecessary brush and component wear**
- Supports consistent floor cleaning results
- Helps extend brush life and reduce operating costs

- Minimises strain on scrub deck components
- Quick replacement reduces machine downtime
- Genuine compatibility ensures reliable operation

Technical Characteristics

- Product Type: Scrub Deck Adjusting Knob
- Compatibility: Fimap IMX Scrubber Dryers
- Function: Scrub Deck & Brush Pressure Adjustment
- Construction: Heavy-Duty Durable Materials
- Installation: Replacement Component
- Application: Machine Control & Adjustment
- Genuine Fimap Spare Part
- Commercial and Industrial Use

Applications

Fimap Scrub Deck Adjusting Knob is ideal for **facilities managers, cleaning contractors, maintenance teams, industrial cleaning operations, warehouses, manufacturing facilities, retail environments and commercial buildings** operating **Fimap IMX scrubber dryers**. Suitable for maintaining accurate scrub deck settings and brush pressure control, it helps ensure optimum cleaning performance, improved productivity and extended machine life.
