

Hurricane Fogging Machine

Variant code: 16-104777

The Hurricane fogger is ideal for commercial use and high touch points, and features a 3.8 litre impact resistant tank and powerful motor.

It also benefits from three precision nozzles for greater output capacity allowing for the covering of droplets up to 4.5 metres away.

The flow rate is 0 to 120ml per minute and droplet size is 10 to 50 microns (depending on setting), with the droplet plume approximately 60cm wide and 4.6m high.
