Jeyes C8 Restore - Glass Renovate & Dishwasher Descaler - 1L

Variant code: 04-YC08

Selden JeyesPro C8 Restore is a **high performance liquid restorer for machine glass and dishwashers**, developed and manufactured in the UK by Selden Research. Supplied under the JeyesPro professional range, C8 Restore is formulated specifically for the renovation of commercial glasswashers and dishwashers where limescale and non-visible film build-up reduce performance and presentation standards.

In busy catering and hospitality environments, mineral deposits and detergent residues gradually accumulate on glassware, crockery and internal machine components. This build-up can dull glass clarity, affect beverage presentation and reduce machine efficiency. C8 Restore is used **neat (100%)**, with the entire bottle emptied directly into the machine water tank before running a normal wash cycle. The formulation works through the system to remove limescale and eliminate film from both washware and internal pipework. It is effective for over 35 washes following treatment and is designed strictly for **professional use only**.

With a **pH of 2**, C8 Restore is an acid-based formulation containing a blend of acids and surfactants engineered to dissolve scale deposits effectively. It is classified as corrosive and requires appropriate personal protective equipment during handling, including gloves and eye protection. The product is REACH compliant and supported by Selden's CleanFM chemical safety management system.

Product Features

- **High performance liquid restorer** for commercial glass and dishwashers
- Removes limescale from glasses, dinnerware and internal machine components
- Eliminates non-visible detergent film build-up
- Used **neat (100%)** for controlled descaling treatment
- Acid-based formulation with advanced surfactant blend

- Effective for over 35 washes following treatment
- Manufactured in the UK by Selden Research

Product Benefits

- **Restores glass clarity** and improves beverage presentation
- Supports consistent hygiene standards in catering environments
- Helps maintain dishwasher and glasswasher efficiency
- Reduces scale-related performance issues
- Extends the effective cleanliness of internal machine systems
- Provides a structured renovation solution within routine maintenance programmes

Technical Characteristics

- Specific Gravity: 1.11
- **pH: 2 (acidic formulation)**
- Classified as corrosive – causes severe skin burns and eye damage
- Wear protective gloves and eye protection when handling
- Store locked up and out of reach of children
- Rinse thoroughly in case of skin or eye contact and seek medical attention if required

Applications

Selden JeyesPro C8 Restore is designed for professional catering operations including bars, restaurants, hotels, schools, healthcare facilities and contract catering environments. It is particularly suitable for bar and cellar glasswash renovation where mineral deposits and film affect glass clarity and head retention. The product is also used in commercial dishwashers to descale internal pipework, tanks and heating elements as part of a scheduled maintenance programme, helping operators maintain both presentation quality and machine efficiency in high-demand settings.
