

KGS Flexis® Diamond Floor Pads 16" – Ultra Fine – Cream – Box of 2

Variant code: 03-D16C

The cream pad is used for buffing wet or dry giving the ultimate in 'wet look shine' for high gloss finishes. If it is used daily, in combination or without the green pad, it will maintain and improve the deep polish shine. KGS Flexis pads are designed to be the ultimate in daily cleaning and polishing of virtually any hard floor without chemicals. Made with Ferrzon®+ microcrystal technology, they produce cleaner and shinier floors in less time.

Green – Perfect for deep cleaning, ensure the pad is wet before use – Use with slow speed Scrubbing Machine or Scrubber Dryer (100–200 rpm)

Black – You can't effectively use any other colour for stripping and you must use this wet. If you use this pad dry you will damage floors. – Use with slow speed Scrubbing Machine (100–200 rpm)

Red – It's a mild floor cleaning pad. Often recommended for use by flooring manufacturers for Scrubber Dryers as there is no risk of it damaging the floor or coating – use with slow or high speed cleaning machine or Scrubber Dryer (100–500 rpm)

Blue – Perfect for spray cleaning a polished floor with heavy scuff marks which makes it ideal for school corridors – Use with slow or high speed Cleaning Machine or Scrubber Dryer (100–400 rpm)

White – Will burnish a polished floor to a high shine. Only use on a clean floor, this is polishing only. Can be used on a Ultra-High-Speed burnisher as long as you keep moving as it will overheat the floor if you stay in one spot too long – Use with high speed Scrubbing Machine (350–500 rpm)
