Makita XGT 40V Brushless Vacuum Sweeper (Body Only)

Variant code: 16-VS001GZ

Makita XGT 40V Max Brushless Vacuum Sweeper is a powerful cordless cleaning solution designed to deliver professional sweeping and vacuuming performance across construction sites, warehouses, workshops and commercial environments. Built on Makita's advanced **XGT 40V Max platform**, this high-performance machine combines exceptional suction power, efficient debris collection and complete cordless freedom to maximise productivity in demanding applications.

At the heart of the sweeper is Makita's advanced **brushless motor technology**, providing increased efficiency, longer runtime and extended service life compared to traditional brushed motors. Delivering up to **160 CFM airflow**, the machine effectively collects everything from fine dust and metal shavings to larger debris such as wood chips and stones. A wide **23-5/8" sweeping path** and rotating brush system allow operators to clean large areas quickly, while the three-speed power selection enables performance to be tailored to different cleaning tasks. The generous **1.9-gallon collection container** reduces emptying frequency, helping maintain productivity during extended cleaning operations.

For enhanced air quality, the vacuum sweeper features a **dual-stage HEPA-level filtration system** capable of capturing 99.97% of particles down to 0.3 microns. Large wheels, an ergonomic handle and a foldable design ensure excellent manoeuvrability, operator comfort and convenient transportation. Supplied as a **body only machine**, it is the ideal addition for users already invested in the Makita XGT 40V Max cordless platform.

Product Features

- **Makita XGT 40V Max cordless platform**
- High-efficiency **brushless motor technology**
- Powerful airflow up to **160 CFM**
- Wide **23-5/8 inch sweeping path**
- **HEPA-level dual-stage filtration** captures 99.97% of fine particles
- Three-speed power selection for different cleaning applications

- Large **1.9-gallon debris container**

Product Benefits

- Provides powerful cordless sweeping and vacuuming performance
- Improves workplace cleanliness and dust control
- Reduces cleaning time with a wide sweeping path
- Enhances air quality through advanced HEPA filtration
- Offers complete mobility without cables or power outlets
- Increases productivity through large debris capacity and extended runtime
- Easy to transport and store with compact folding design

Technical Characteristics

- Professional **cordless vacuum sweeper**
- Powered by Makita **XGT 40V Max lithium-ion batteries**
- Brushless motor for improved efficiency and durability
- Airflow performance up to **160 CFM**
- **23-5/8 inch sweeping width**
- **1.9-gallon collection container**
- Supplied as **body only** – battery and charger sold separately

Applications

Makita XGT 40V Max Brushless Vacuum Sweeper is ideal for construction sites, warehouses, workshops, factories, maintenance teams, facilities management and large residential properties. Its ability to handle both wet and dry debris, combined with powerful suction, advanced filtration and cordless operation, makes it an excellent choice for professionals seeking efficient and versatile cleaning performance without the restrictions of mains power.

Property	Value
Length (mm)	830
Warranty (Years)	29.2
