Micro-box Microfibre Cloth 30x30 cm - Box of 50 - Yellow

Variant code: 12-104123Y

Micro-Box Microfibre Cloth - 30x30 cm is designed to deliver effective and efficient cleaning performance across a wide range of environments. Manufactured using high-quality microfibre, these cloths are engineered to lift, trap and remove dirt, grease and bacteria without the need for excessive cleaning chemicals.

The microfibre construction provides excellent absorbency and durability, making the cloths suitable for repeated use in demanding cleaning tasks. Their compact **30x30cm size** ensures ease of handling and control, allowing precise cleaning of surfaces including worktops, equipment and fixtures.

Available in **Blue and Red colour options**, these cloths support colour-coded cleaning systems to help reduce the risk of cross-contamination in hygiene-sensitive environments. Supplied in a convenient box format, they are ideal for high-frequency use in commercial and professional settings.

Product Features

- **High-quality microfibre construction**
- Suitable for **general purpose cleaning**
- Compact **30x30cm cloth size**
- Available in **Blue and Red colour options**
- Highly **absorbent and durable**
- Supplied in convenient box format

Product Benefits

- Effectively lifts and traps dirt and grease
- Reduces reliance on cleaning chemicals
- Supports hygiene through colour-coded cleaning systems
- Provides long-lasting performance through repeated use
- Improves cleaning efficiency and surface finish
- Suitable for high-frequency cleaning environments

Technical Characteristics

- Material: microfibre

Tel: 01626 355177
Email: info@aukhygiene.com

- Cloth size: 30x30cm
- Supplied in box quantity format
- Reusable and washable construction
- Suitable for wet and dry cleaning applications
- Compatible with standard cleaning procedures

Applications

These microfibre cloths are suitable for use in commercial cleaning, hospitality, healthcare, and general facilities management. They are ideal for wiping surfaces, cleaning equipment and maintaining hygiene standards in kitchens, washrooms and workspaces. The colour-coded options make them particularly effective in environments where cross-contamination control is essential.
