Numatic Transport Trolley for 440NX

Variant code: 16-914088

Numatic Transport Trolley is a **professional cleaning and transport system** designed to maximise the efficiency and productivity of the **Numatic 440NX Cordless Scrubber Dryer**. Combining robust construction, intelligent storage and dedicated machine transportation, this versatile trolley serves as a complete mobile cleaning workstation for contract cleaners, facilities management teams and professional cleaning operations.

Featuring a dedicated **440NX scrubber dryer mounting bracket**, the trolley allows operators to transport their scrubber dryer alongside essential cleaning supplies in one organised unit. This integrated design reduces unnecessary trips to storage areas, improves workflow efficiency and helps cleaning teams complete tasks more productively.

Built using Numatic's innovative **ReFlo Technology**, the trolley is manufactured from a minimum of **50% recycled high-quality plastic** while maintaining the durability and reliability expected from commercial cleaning equipment. The tough Structofoam construction offers excellent resistance to impacts, chemicals and daily wear, making it ideal for demanding environments.

The trolley offers substantial storage capacity, including a **120L waste bag capacity (or 2 x 70L collectors)**, pull-out storage drawer and top storage tray, providing ample room for cleaning chemicals, cloths, accessories, batteries and consumables. Heavy-duty non-marking castors ensure smooth manoeuvrability, while rotating corner buffers help protect walls, furniture and doors from accidental damage.

Designed to streamline cleaning operations, reduce labour time and improve organisation, the Numatic Transport Trolley is an ideal solution for businesses seeking a professional and efficient approach to facility cleaning.

Product Features

- Genuine Numatic transport trolley
- Dedicated mounting bracket for the

Numatic 440NX Scrubber Dryer
- Large 120L waste bag capacity or 2 x 70L collectors
- Pull-out storage drawer and top storage tray
- Manufactured using ReFlo recycled plastic technology
- Heavy-duty Structofoam construction
- Non-marking swivel castor wheels
- Rotating corner buffers for impact protection

Product Benefits

- **Improves cleaning efficiency by transporting machine and supplies together**
- **Reduces unnecessary trips and increases productivity**
- **Provides organised storage for cleaning equipment and consumables**
- Supports professional cleaning workflows
- Durable construction withstands demanding commercial environments
- Helps protect walls and furniture during transport
- Sustainable design using recycled materials
- Easy manoeuvrability across multiple floor surfaces

Technical Characteristics

- Product Type: Cleaning Transport Trolley
- Compatibility: Numatic 440NX Scrubber Dryer
- Waste Capacity: 120L or 2 x 70L Collectors
- Storage Features: Pull-Out Drawer & Top Tray
- Construction: Structofoam with ReFlo Technology
- Material Content: Minimum 50% Recycled Plastic
- Wheel Type: Heavy-Duty Non-Marking Castors
- Genuine Numatic Accessory

Applications

The Numatic Transport Trolley is ideal for **contract cleaning companies, healthcare facilities, schools, universities, offices, retail environments, hospitality venues, leisure centres and public buildings**. Designed to support the **Numatic 440NX Scrubber Dryer**, it
