Osprey Provap GumCart - 9 Bar Continuous Steam Machine inc Accessories

Variant code: 16-M6049

Osprey Provap GumCart is a **professional 9-bar continuous dry steam gum removal machine** designed to provide a fast, effective and environmentally responsible solution for removing chewing gum deposits from public spaces and commercial environments. Compact, robust and highly portable, the GumCart is specifically engineered to tackle one of the most persistent cleaning challenges while delivering exceptional productivity throughout the working day.

Using powerful **9-bar continuous dry steam technology**, the GumCart works in conjunction with Osprey's specialist detergent to dissolve chewing gum on contact. With minimal agitation from the operator, gum deposits can typically be removed in approximately **three seconds**, dramatically reducing labour time compared with traditional removal methods.

Unlike high-pressure water systems, the GumCart utilises low-moisture dry steam, eliminating the unsightly "snail trails" often left behind after cleaning. This makes it an ideal solution for maintaining the appearance of pavements, shopping centres, transport hubs and public spaces while reducing water consumption and environmental impact.

Built for professional use, the machine is easy to transport and capable of operating continuously throughout the day. For enhanced mobility in outdoor environments, the GumCart can also be upgraded with an optional bespoke trolley and low-noise petrol generator to create the fully mobile **GumTrolley** system.

Product Features

- **9-bar continuous dry steam gum removal machine**
- Supplied complete with accessories
- Compact and portable design
- Designed specifically for chewing gum removal
- Continuous steam production for all-day operation
