

Osprey Provap GumCart – 9 Bar Continuous Steam Machine inc Accessories

Variant code: 16-M6049

The GumCart provides a compact solution for all those unsightly gum deposits carelessly discarded everywhere; this robust machine is easy to transport and will bust gum all day long.

The GumCart makes great use of dry steam. When combined with our own detergent the GumCart dissolves gum on contact and, with a little agitation with a brush by the operator; the gum is busted in approx. 3 seconds flat!!

It's the ideal cost-effective and eco-friendly way to remove unpleasant gum residues without leaving any telltale "snail trails" that commonly occur with the use of high-pressure water.

The GumCart is also available with an optional bespoke green trolley and low noise petrol Generator converting the machine into the GumTrolley.
