P-Wave OurFresh-e Air Freshener Refill - Pack of 6 - Mango

Variant code: 05-105248M

P-Wave OurFresh-e Air Freshener Refill is designed to deliver a sweet, fruity and refreshing **Mango fragrance** throughout indoor environments. Inspired by the juicy aroma of ripe mangoes, this vibrant scent helps create a pleasant and welcoming atmosphere in washrooms, offices, reception areas and other shared facilities. Ideal for commercial and domestic settings, the refill provides a convenient way to maintain consistent fragrance while helping reduce the perception of unwanted odours.

Designed for use with the **P-Wave OurFresh air freshener dispenser system**, the refill works with the dispenser's **high-speed fan technology** to distribute fragrance throughout the surrounding area. Each refill provides **up to 30 days of continuous freshness**, with fragrance coverage of up to **50m²** when used with a compatible dispenser. The dispenser features an integrated **charcoal filter** and three adjustable fragrance intensity settings – high, medium and low – allowing fragrance output to be tailored to the room size and individual preference.

Manufactured from **recyclable EVA material containing up to 15% recycled content**, the solid fragrance refill provides a practical alternative to conventional aerosol air fresheners. Its **non-liquid, propellant-free design** eliminates the need for pressurised sprays and helps prevent messy spills or leaks. Simply insert the refill into a compatible **OurFresh plug-in or battery-operated dispenser** and select the preferred fragrance setting. Supplied in a **pack of 6 Mango refills**, it provides a convenient supply for multiple dispensers or regular replacement cycles.
