

Proton Quash – Pre-Wash Lipstick Remover – Starter Pack

Variant code: 04-P71419

Quash Lipstick Remover Glassware Starter Pack is a **professional glass renovation system** developed to remove lipstick, grease and detergent film from drinking glasses in hospitality environments. Quash specialises in glass care solutions for the licensed trade, where clarity and presentation directly influence customer perception.

Lipstick and invisible detergent film can remain on glassware even after routine machine washing. Over time, this build-up reduces clarity and affects beverage presentation, particularly in beer service. This starter pack provides a **structured treatment process** that removes stubborn residues and restores glass appearance. It supports operators in maintaining consistent presentation standards across bars, restaurants and hotels.

The system integrates into existing commercial glasswashing routines without requiring specialist machinery. The formulation targets cosmetic residues while supporting the long-term condition of glassware. As part of the wider Quash range, it can be paired with compatible glasswasher detergents and rinse aids to maintain results between renovation cycles.

For ongoing maintenance, see our related professional glasswasher detergents and rinse aids. Refer to official Quash documentation for full technical guidance.

Product Features

- **Professional lipstick and film remover** for commercial glassware
- Designed for hospitality and licensed trade environments
- Removes lipstick residue and detergent film build-up
- Restores clarity to drinking glasses
- Suitable for use in standard commercial

glasswashers

- Supplied as a **starter pack for controlled treatment application**

Product Benefits

- Improves glass presentation standards
- Supports beverage clarity and foam retention
- Reduces visible residues that affect customer perception
- Enhances hygiene confidence in high-traffic venues
- Integrates into existing wash routines
- Provides a **controlled approach to periodic glass renovation**

Technical Characteristics

- Designed for use with commercial glasswashing machines
- Follow manufacturer dosing and application guidance
- Suitable for scheduled renovation treatments
- Use alongside compatible detergents and rinse aids
- Store in a cool, dry location
- Consult Safety Data Sheet before use

Applications

Quash Lipstick Remover Glassware Starter Pack is suitable for pubs, bars, restaurants, hotels and other hospitality venues where glass presentation is critical. It is particularly effective in high-volume environments where lipstick transfer and detergent film frequently affect glass clarity. The system supports routine renovation of pint glasses, wine glasses and other drinkware to maintain professional service standards.
