

PVA Hygiene Disinfectant Detergent – Floors and Hard Surfaces – Pack of 100

Variant code: 07-A5100S

PVA Hygiene Disinfectant Detergent is a **professional cleaning and disinfecting solution** designed for use on floors and hard surfaces in commercial and regulated environments. Developed by PVA Hygiene, a brand focused on sustainable and efficient cleaning systems, this product is supplied in **water-soluble sachets** that support accurate dosing and reduced chemical waste.

The formulation combines cleaning and disinfecting performance in a single application, allowing operators to remove soil while maintaining hygiene standards. The **soluble sachet system** eliminates the need for manual measuring, helping ensure consistent dilution and reducing the risk of overdosing. This supports both operational efficiency and environmental responsibility by minimising packaging and chemical handling.

Designed for use across a wide range of surfaces, the product is suitable for routine cleaning programmes where both cleanliness and disinfection are required. It integrates easily into existing cleaning workflows and can be paired with appropriate mopping systems, cloths and equipment to support structured hygiene management.

Product Features

- **Disinfectant detergent** for floors and hard surfaces
- Supplied in **water-soluble sachets** for accurate dosing
- Combines cleaning and disinfecting in one application
- Designed for professional and commercial environments
- Reduces chemical waste through controlled dilution
- Compatible with standard cleaning equipment and systems

Product Benefits

- Supports consistent hygiene and cleaning standards
- Reduces dosing errors and improves efficiency
- Minimises chemical handling for safer use
- Helps reduce packaging waste and environmental impact
- Simplifies cleaning processes with combined functionality
- Suitable for structured cleaning programmes

Technical Characteristics

- Supplied as water-soluble sachets for dilution in water
- Designed for use on floors and hard surfaces
- Use with mops, buckets or cleaning systems as required
- Follow manufacturer dilution and usage guidelines
- Store in a cool, dry environment
- Use appropriate PPE when handling cleaning chemicals

Applications

PVA Hygiene Disinfectant Detergent is suitable for use in healthcare, education, hospitality and general commercial environments where both cleaning and disinfection are required. It is particularly effective for routine floor cleaning and hard surface maintenance in high-traffic areas such as corridors, washrooms and communal spaces. The soluble sachet format makes it ideal for facilities seeking consistent dosing, reduced waste and efficient cleaning workflows within structured hygiene programmes.
