Winter Grit Rock Salt - 19kg

Variant code: 04-419

Winter Grit Rock Salt is a **natural brown rock salt** designed for effective snow and ice clearance from outdoor surfaces during cold weather. Ideal for use on **paths, driveways, walkways and other suitable external areas**, it helps melt accumulated ice and snow, improving surface grip and reducing the risk of slips and falls in winter conditions.

Made from **naturally occurring rock salt**, this winter gritting product provides a practical and effective solution for maintaining outdoor access routes. When spread over icy or snow-covered surfaces, the salt helps lower the freezing point of water, encouraging ice and snow to melt and making it easier to clear affected areas. It can also be applied ahead of forecast freezing conditions to help reduce the formation of ice.

Supplied in a convenient **19kg bag**, Winter Grit Rock Salt is suitable for routine winter maintenance in domestic, commercial and public environments. It can be applied manually or with a compatible salt spreader, making it a versatile choice for treating pedestrian routes, entrances and vehicle access areas. Its **natural composition and reliable de-icing action** make it a useful addition to winter maintenance supplies.

Product Features

- **Natural brown rock salt** for winter gritting and de-icing
- **Effective snow and ice clearance** from paths, driveways and suitable outdoor surfaces
- Helps **lower the freezing point of water** to encourage ice and snow to melt
- Suitable for **preventative gritting** ahead of forecast freezing conditions
- Helps improve **grip on slippery outdoor surfaces**
- Suitable for **pedestrian walkways, entrances and vehicle access areas**
- **Naturally occurring mineral salt** for practical winter maintenance
- Can be applied manually or with a compatible **salt spreading device**
- Suitable for domestic, commercial and public outdoor environments
- Designed for use during snow, frost and

icy weather conditions
- Convenient bag format for storage and handling
- Supplied in a **19kg bag**

Product Benefits

- **Effective de-icing action** helps clear snow and ice from outdoor access routes
- **Improved surface grip** helps reduce slip hazards during freezing weather
- **Preventative application** can help limit ice formation when applied before freezing conditions
- **Versatile outdoor use** makes it suitable for paths, driveways, entrances and other compatible surfaces
- **Natural mineral composition** provides a straightforward solution for winter gritting
- **Flexible application methods** allow manual spreading or use with suitable gritting equipment
- **Practical winter maintenance** helps keep essential access routes usable during cold weather
- **Suitable for domestic and commercial premises** where regular snow and ice treatment is required
- **Convenient bagged supply** allows salt to be stored ready for seasonal use
- **Reliable cold-weather performance** supports routine winter safety and maintenance procedures

Technical Characteristics

- **Product Type:** Winter Grit / Rock Salt
- **Salt Type:** Brown Rock Salt
- **Material:** Naturally Occurring Mineral Salt
- **Primary Component:** Sodium Chloride
- **Colour:** Brown
- **Form:** Granular Rock Salt
- **Pack Weight:** 19kg
- **Packaging Format:** Bag
- **Primary Application:** Snow and Ice Clearance
- **Secondary Application:** Preventative Winter Gritting
- **Suitable Areas:** Paths, Driveways, Walkways, Entrances and Compatible Outdoor Hard Surfaces
- **Action:** Lowers the Freezing Point of Water to Help Melt Ice and Snow
- **Application Method:** Spread Evenly by Hand Using Suitable Protective Equipment or with a Compatible Salt

Spreader

- **Application Rate:** Adjust According to Surface Conditions, Weather and Local Winter Maintenance Guidance
- **Best Practice:** Remove Heavy Snow Before Applying Salt Where Practical
- **Temperature Considerations:** De-Icing Performance Reduces as Temperatures Fall Significantly Below Freezing
- **Surface Precautions:** Avoid Excessive Application to Sensitive Paving, Natural Stone and Metal Surfaces
- **Environmental Precautions:** Prevent Unnecessary Salt Run-Off into Soil, Planting Areas and Watercourses
- **Quantity:** Each
- **Storage:** Store in a Cool, Dry, Covered Area and Protect from Moisture
- **Handling:** Wear Suitable Gloves and Avoid Prolonged Skin Contact

Applications

Ideal for **snow and ice clearance** on paths, driveways, walkways, entrances and outdoor access routes. Suitable for **winter gritting and preventative ice treatment** at homes, offices, schools, warehouses, car parks and commercial premises.
