Pacvac Replacement Hypercone Cloth Filter Bag

Variant code: 16-DUB003

Pacvac Hypercone Reusable Cloth Filter Bag is a **genuine replacement filtration component** designed for use with **Pacvac Superpro backpack vacuum cleaners**. Positioned beneath the disposable paper dust bag, this reusable cloth filter provides an additional layer of filtration, helping to protect the vacuum motor while improving dust containment and overall machine performance.

Manufactured from durable filtration material, the Hypercone filter bag captures fine dust and airborne particles before they reach the vacuum's motor assembly. This helps maintain airflow efficiency, prolong motor life and support consistent suction performance during daily cleaning operations.

Designed for repeated use, the reusable cloth construction offers a cost-effective and environmentally responsible alternative to single-use filtration systems. The filter is simple to remove, clean and reinstall, making routine maintenance quick and straightforward for operators.

As a genuine Pacvac accessory, the Hypercone Cloth Filter Bag ensures perfect compatibility with Superpro backpack vacuum cleaners, helping to maintain optimum filtration performance and maximise machine longevity.

Product Features

- **Genuine Pacvac Hypercone cloth filter bag**
- Designed for **Pacvac Superpro backpack vacuums**
- Sits beneath the disposable paper dust bag
- Reusable and washable design
- Improves dust filtration efficiency
- Helps protect the vacuum motor
- Durable cloth construction

Product Benefits

- **Provides an additional layer of filtration**
- **Helps maintain optimum suction**

performance
- **Protects motor components from dust ingress**
- Reusable design reduces replacement costs
- Easy to remove, clean and reinstall
- Supports longer machine life and reliability

Technical Characteristics

- Product Type: **Reusable Cloth Filter Bag**
- Range: **Pacvac Hypercone**
- Compatibility: **Pacvac Superpro Machines**
- Position: Beneath Disposable Paper Dust Bag
- Material: Durable Filtration Cloth
- Reusable: Yes
- Genuine Pacvac accessory

Applications

Pacvac Hypercone Reusable Cloth Filter Bag is ideal for **commercial cleaning contractors, schools, offices, healthcare facilities, hospitality venues, retail environments and facilities management teams** using Pacvac Superpro backpack vacuum cleaners. Suitable for daily vacuum cleaning operations, it helps maintain high filtration standards, protect machine components and ensure consistent cleaning performance.

Property	Value
Colour	Grey
Capacity (L)	5
Material	SMS (Spunbond Meltblown Spunbond) Material
How to Use	Install the reusable SMS cone dust bag into a compatible Pacvac backpack vacuum. Empty the bag when full and reuse as required. For additional filtration, use in conjunction with a disposable dust bag.
