Pacvac - Velo Hypercone Upgrade Kit - Includes Lid, Reusable Dust Bag, Paper Bags & Pre-Motor Filter

Variant code: 16-SEK016

Pacvac Velo Hypercone Upgrade Kit is a **complete filtration and performance enhancement kit** designed for compatible **Pacvac Velo backpack vacuum cleaners**. Combining an upgraded lid and advanced filtration components, this genuine Pacvac service kit helps maintain maximum airflow, improve dust retention and extend vacuum performance during demanding commercial cleaning operations.

The kit features a uniquely designed **clear offset lid** and advanced filtration system that work together to create a cyclonic airflow effect within the vacuum chamber. This innovative design helps lift dust from the bottom of the dust bag, maintaining consistent airflow and suction performance as the bag fills. The ergonomic offset inlet design also accommodates both left and right-handed operators for greater user comfort.

Included within the kit is a **2.5L reusable SMS bucket dust bag**, a **pack of 10 disposable paper dust bags**, and a **pre-motor Hypercone filter**. The disposable paper bags provide an additional level of filtration for improved dust retention and hygienic disposal, while the reusable dust bag supports efficient dust collection and must be used in conjunction with the paper bags.

The snorkel-style **pre-motor cone filter** promotes unrestricted airflow throughout operation, helping to keep the motor cooler, maintain strong suction and improve overall vacuum efficiency. As a genuine Pacvac upgrade kit, all components are designed for seamless compatibility and optimum performance.

Product Features

- **Complete Pacvac Hypercone upgrade and service kit**
- Designed for compatible **Pacvac Velo vacuum cleaners**
- Includes clear offset lid
- Includes **2.5L reusable SMS bucket dust bag**

- Includes **10 x 2.5L disposable paper dust bags**
- Includes pre-motor Hypercone cone filter
- Cyclonic airflow enhancement design
- Suitable for left and right-handed operators
- Genuine Pacvac approved components

Product Benefits

- **Improves airflow and suction consistency**
- **Provides enhanced dust retention and filtration**
- **Helps maintain motor cooling and efficiency**
- Reduces performance loss as dust bag fills
- Improves indoor air quality through additional filtration
- Extends vacuum performance and reliability
- Convenient all-in-one maintenance and upgrade solution

Technical Characteristics

- Product Type: **Filtration Upgrade & Service Kit**
- Compatibility: **Pacvac Velo**
- Included Components:
  - Clear Offset Lid
  - 2.5L Reusable SMS Bucket Dust Bag
  - 2.5L Disposable Paper Dust Bags (Pack of 10)
  - Pre-Motor Hypercone Filter
- Filtration System: Multi-Stage
- Airflow Enhancement: Cyclonic Effect Design
- Operator Compatibility: Left and Right-Handed Use
- Genuine Pacvac accessory kit

Applications

Pacvac Velo Hypercone Upgrade Kit is ideal for **commercial cleaning contractors, healthcare facilities, schools, offices, hospitality venues, retail environments and facilities management teams** using Pacvac Velo vacuum cleaners. Suitable for routine servicing, filtration upgrades and preventative maintenance, the kit helps maximise airflow, improve dust capture, maintain suction performance and support cleaner indoor environments.
