

Pacvac Velo Hypercone Upgrade Kit inc Lid, Cloth Dust Bag, Disposable Paper Bags & Hypercone Filter

Variant code: 16-SEK016

This service kit includes:

- Clear offset lid
- 2.5L Disposable paper dust bag – 10 pack
- 2.5L Reusable SMS bucket dust bag
- Pre-motor cone filter

Uniquely designed offset inlet and clear dome lid create a cyclonic effect to help lift the dust from the bottom of the dust bag to maintain maximum airflow.

Suits either left or right-handed operators.

The disposable dust bag provides an extra level of filtration for better dust retention and it must be used in conjunction with a reusable dust bag.

The snorkel-like pre-motor cone filter allows consistent airflow through the vacuum cleaner as the dust bag fills, keeping the motor cool, maintaining high levels of suction for longer.
