Polka Dot Glove - XL - Black

Variant code: 22-A110BKRXL

Polka Dot Glove – Black: The Ultimate Blend of Grip and Dexterity

The **Polka Dot Glove in Black** is a versatile powerhouse designed for those who need a reliable, high-friction grip without sacrificing the "feel" of the task at hand. Engineered for **maximum efficiency in dry conditions**, this glove is a staple for warehousing, general assembly, and light construction.

Unlike bulky industrial gloves, the Polka Dot series focuses on **high dexterity** and breathability. The sleek black-on-black design not only looks professional but is excellent at hiding dirt and grease, keeping your team looking sharp throughout the workday.

Key Features & Performance Benefits

- **Enhanced PVC Dot Grip:** The palm and fingers are reinforced with high-traction PVC dots. This ensures a **superior grip** on smooth surfaces, boxes, and tools, significantly reducing hand strain.
- **13-Gauge Seamless Liner:** The ultra-fine 13-gauge knit provides a **second-skin fit**. This seamless construction eliminates irritation and chafing, making it comfortable for all-day wear.
- **Optimal Dexterity:** Designed for precision, these gloves allow you to handle small parts, write, or use basic touch interfaces without having to remove your PPE.
- **Breathable Comfort:** The knitted liner allows air to circulate around the hand, preventing sweat buildup and keeping you cool under pressure.
- **Ambidextrous/Multi-Purpose:** Ideal for fast-paced environments like logistics and picking-and-packing where quick application is key.

Technical Specifications

Feature	Detail
Material	Lightweight Polyester/Cotton Blend
Grip Type	Raised PVC Polka Dots
Gauge	13-Gauge (Fine Knit)
Color	Professional Black
Ideal For	Dry Handling, Inspection, Assembly

Professional Tips for Users

- **The "Box-Handler" Hack:** If you are working in a high-volume warehouse, use these gloves to prevent "cardboard burn." The PVC dots take the friction that would otherwise wear down your skin.
- **Check for Wear:** Because the dots provide the grip, inspect the palms regularly. Once the dots start to flatten or wear away, it's time for a fresh pair to ensure **workplace safety**.
- **Layering:** In colder warehouses, these 13-gauge gloves are thin enough to be used as a liner under heavier waterproof gloves for an extra layer of warmth.

Frequently Asked Questions (FAQs)

Q: Are these gloves suitable for oily environments?

A: These gloves are specifically optimised for **dry conditions**. While the PVC dots provide great traction on dry items, they are not designed for heavy oil or chemical handling.

Q: Do these gloves come in different sizes?

A: Yes, the elasticated knit allows for a flexible fit, but we offer a range of sizes to ensure the **seamless liner** sits perfectly against your palm for maximum control.

Q: Can I wash the Polka Dot Gloves?

A: Absolutely. They can be machine-washed on a cold, gentle cycle. We recommend air drying to maintain the integrity of the PVC dots and prevent the knit from shrinking.

Why Choose the Black Polka Dot Glove?
