Polka Dot Glove - XXL - White/Blue

Variant code: 22-A110WBRXXL

Polka Dot Plus Work Gloves – White/Blue

Experience the perfect blend of comfort, durability, and high-visibility style with our **Polka Dot Plus Work Gloves**. Designed for those who need a reliable grip without sacrificing manual dexterity, these extra-large gloves are a staple for any toolbox, warehouse, or garden shed.

The striking **White/Blue colourway** isn't just about aesthetics; the high-contrast blue dots on a crisp white background make these gloves easy to locate in a busy workspace. Crafted from a breathable cotton-poly blend and reinforced with specialised PVC "polka dots," these gloves offer a **superior non-slip grip** that excels in both dry and slightly oily conditions.

Key Features & Benefits

- **Enhanced Traction:** The blue PVC dots are strategically patterned across the palm and fingers to provide maximum surface friction, making it easier to handle tools, boxes, and slippery materials.
- **Breathable Comfort:** The lightweight, seamless knit fabric ensures your hands stay cool and dry, even during long shifts or intense DIY projects.
- **Durable Protection:** The **Polka Dot Plus** series is built to withstand abrasion, protecting your skin from scrapes, splinters, and minor irritations.
- **Precision Fit:** Sized at **Extra Large (XL)**, these gloves offer a generous fit that prevents hand fatigue while maintaining enough tactile sensitivity for detailed tasks.
- **Versatile Utility:** Ideal for construction, logistics, automotive work, gardening, and general maintenance.

Pro-Tips for Maximum Performance

- **The "Snug" Test:** While these are XL, ensure the knit wrist sits firmly against your skin to prevent debris, like sawdust or dirt, from entering the glove.
- **Keep Them Fresh:** To extend the life of your PVC dots, hand wash these gloves in cool water with mild detergent and air dry. Avoid high heat, which can compromise the grip texture.
- **Double Up:** For heavy-duty outdoor winter work, these make excellent liners inside larger leather or waterproof gloves for added warmth and grip.

Frequently Asked Questions (FAQs)

Q: Are these gloves touch-screen compatible?
A: While primarily designed for grip and protection, the high-density PVC dots may work on some capacitive screens, but for precision typing, we recommend removing them.

Q: Do the blue dots peel off easily? A: No. The **Polka Dot Plus** technology uses a heat-bonded PVC application process to ensure the dots remain integrated into the fabric even under heavy friction.

Q: Can I use these for gardening? A: Absolutely! They are excellent for handling wooden tool handles and moving pots, though they are not puncture-proof against heavy thorns like roses.
