Polythene Food Safe Bags - 80g - Box of 500 - Clear

Variant code: 18-BLY

Polythene Food Safe Bags are reliable **clear food-grade storage and handling bags** designed for hygienic food preparation, storage and transportation in commercial catering, hospitality and food processing environments. Manufactured from durable food-safe polythene, these clear bags provide dependable performance while supporting hygienic handling and safe food contact procedures.

Designed for versatile everyday use, these lightweight food-safe bags are suitable for storing, portioning and transporting a wide range of food products and ingredients. Their transparent **clear finish** allows easy identification of contents, improving efficiency and organisation in kitchens, catering environments and food preparation areas. The hygienic food-safe construction makes them ideal for maintaining clean handling standards during storage and service operations.

Supplied in a practical **box of 500 bags**, these polythene food bags provide a cost-effective and convenient solution for busy food service environments requiring reliable disposable food handling consumables.
