Prochem Fivestar - Upright Self-Contained Power Brush Carpet, Floor and Upholstery Cleaning Machine

Variant code: 16-TR300

Prochem Fivestar is a **high-performance upright self-contained carpet, floor and upholstery cleaning machine** designed to deliver professional cleaning results with exceptional ease of use. Combining powerful solution application, vacuum extraction and a patented self-adjusting brush system into one compact unit, the Fivestar enables operators to achieve deep cleaning and fast drying with minimal effort.

Its completely self-contained design eliminates the need for separate hoses and wands during standard carpet cleaning. A powerful pump and vacuum system work alongside a **patented self-adjusting, self-levelling brush and vacuum shoe**, ensuring consistent cleaning performance across a wide variety of carpet types. The result is effective soil removal, improved carpet appearance and reduced drying times.

The versatile Fivestar also features a built-in **All-Floor solution control valve**, allowing it to clean hard floors, tiles and grout in addition to carpets. For added flexibility, an optional hand tool can be attached to the rear of the machine for cleaning upholstery, stairs, edges and other difficult-to-reach areas.

Designed with operator convenience in mind, the machine includes an adjustable folding handle, a patented lift-off bucket for easy filling and emptying, a transparent recovery dome for monitoring recovery levels and a side extension that cleans right up to skirting boards. The upright-mounted motor and intercooler system provide reliable long-term performance, making the Fivestar a dependable solution for professional cleaning operations.

Product Features

- **Upright self-contained carpet, floor and upholstery cleaning machine**
- Powerful pump and vacuum extraction system
- Patented self-adjusting, self-levelling
