Prochem Powermate 1200 - Power Wand

Variant code: 16-AC1204

Prochem Powermate 1200 is a **professional powered carpet extraction wand** designed to significantly enhance cleaning performance and productivity when used with compatible carpet extraction machines. Combining powerful extraction with a high-speed cylindrical brush, the Powermate 1200 transforms a standard box extractor into a highly effective hybrid brush cleaning system, making it ideal for large carpeted areas.

At the heart of the machine is a **self-levelling cylindrical brush rotating at 2500rpm**, which agitates carpet fibres to loosen embedded dirt and debris before extraction. This mechanical brushing action improves soil removal, delivers deeper cleaning results and helps restore carpet appearance more effectively than extraction alone.

The Powermate 1200 features a **30cm (12-inch) vacuum head** that provides efficient coverage while remaining lightweight and easy to manoeuvre. Its ergonomic design allows operators to work comfortably across large areas, improving productivity without sacrificing cleaning performance.

Supplied with a **25ft power cable**, the unit provides excellent operational reach and flexibility. Designed for professional carpet cleaners and facilities maintenance teams, the Powermate 1200 is an ideal solution for enhancing extraction cleaning results in commercial environments.

Product Features

- **Professional powered carpet extraction wand**
- Self-levelling cylindrical brush system
- **2500rpm brush speed**
- **30cm (12") vacuum head**
- Lightweight and easy-to-manoeuvre design
- Converts standard extractors into hybrid brush machines
- **25ft power cable**
- Deep carpet agitation and extraction performance

- Genuine Prochem professional equipment

Product Benefits

- **Delivers deeper carpet cleaning results**
- **Loosens embedded dirt before extraction**
- **Improves productivity on large carpeted areas**
- Reduces operator effort through self-levelling brush action
- Enhances soil removal and carpet appearance
- Lightweight design improves manoeuvrability
- Ideal upgrade for standard extraction systems

Technical Characteristics

- Model: **Prochem Powermate 1200**
- Product Type: **Powered Carpet Extraction Wand**
- Brush Type: Self-Levelling Cylindrical Brush
- Brush Speed: **2500rpm**
- Cleaning Width: **30cm (12")**
- Power Cable Length: **25ft**
- Application: Carpet Extraction & Agitation
- Compatibility: Suitable for compatible box extractors
- Construction: Professional-Duty Design

Applications

Prochem Powermate 1200 is ideal for **professional carpet cleaners, contract cleaning companies, hotels, offices, schools, healthcare facilities, conference centres and commercial buildings**. Designed for cleaning **large carpeted areas, corridors, function rooms, offices and public spaces**, it combines mechanical agitation with extraction cleaning to deliver superior soil removal, improved carpet appearance and enhanced productivity.

Property	Value
Weight (kg)	6.8
Brush Speed (rpm)	2500
Power Cord (m)	7.6
