Prochem Pro 35 - Contra Rotating Scrubbing Machine Complete with Renovator, Brush Trays, Transport Trolley and Blue Standard Brushes

Variant code: 16-CA3802

Prochem Pro 35 is a **versatile contra rotating scrubbing machine** designed to provide both **dry and wet cleaning capabilities** for carpets and hard floors in a single professional machine. Combining powerful contra-rotating brush technology with IPX4-certified wet cleaning performance, the Pro 35 offers exceptional flexibility for contract cleaners, facilities managers and maintenance teams seeking an all-in-one floor care solution.

Supplied as a complete package, the Pro 35 includes a **Renovator system, brush covers, transport trolley and blue standard brushes**, allowing operators to tackle a wide range of cleaning applications immediately. The contra-rotating brush action effectively lifts dirt, debris and embedded contamination from carpet fibres and hard floor surfaces while improving cleaning efficiency and floor appearance.

For carpet maintenance, the Pro 35 can be used with **Prochem Fiberdri dry cleaning compound** for low-moisture cleaning or **Procaps encapsulation cleaner** for effective interim carpet maintenance. The machine is equally effective on hard surfaces including studded rubber flooring, PVC, safety flooring, tiles and stone floors when used with appropriate Prochem hard surface cleaning products.

Built for professional use, the Pro 35 provides outstanding cleaning versatility while reducing the need for multiple specialist machines. Optional soft carpet brushes and hard floor brushes further extend the machine's capabilities across a wide variety of floor types and cleaning tasks.

Product Features

- **Dry and wet carpet and floor cleaning machine**
- Contra rotating brush technology
- IPX4 wet cleaning certified
