Prochem Fibredri TM4 - Carpet Cleaning Machine

Variant code: 16-CA3801

Prochem Fiberdri TM4 is a professional **dry carpet cleaning machine** designed to deliver fast, effective carpet maintenance with minimal downtime. Utilising advanced dry compound cleaning technology, the TM4 cleans deep into carpet fibres while allowing areas to be returned to service almost immediately, making it ideal for busy commercial environments where disruption must be kept to a minimum.

Engineered for exceptional cleaning performance, the Fiberdri TM4 features a powerful counter-rotating brush system that works cleaning compound deep into carpet fibres, loosening and lifting embedded dirt, grease and soil. The brushes effectively agitate the carpet pile, restoring appearance and freshness while helping to extend carpet life. Because the system uses very little moisture, carpets are left clean, dry and ready for use far quicker than with traditional wet extraction methods.

Built for reliability and ease of operation, the TM4 combines robust construction with excellent manoeuvrability and simple controls. Suitable for routine maintenance cleaning and interim carpet care programmes, it provides professional cleaners and facilities teams with a productive and cost-effective solution for maintaining carpets to a high standard in commercial and public environments.

Product Features

- **Professional dry carpet cleaning machine**
- Counter-rotating brush cleaning system
- Designed for dry compound carpet cleaning methods
- Deep cleaning action removes embedded dirt and soil
- Low-moisture operation for rapid return to service
- Simple controls and easy manoeuvrability
