Prochem Shockaway - 4 x 5L

Variant code: 09-B194

A water-based anti-static treatment for carpets and fabrics. Shockaway will help prevent the build-up of static electricity on carpet and fabrics and is formulated to help prevent re-soiling on carpets. Shockaway should be used in conjunction with other measures such as increasing relative humidity, reducing heat and the use of anti-static mats or carpeting.

Features:

- Anti-static treatment for carpets and other surfaces where static electricity build-up is a problem.
- Shockaway leaves a non-sticky coating which conducts the electrical charge away from the fibre surface.
- Apply by sprayer to clean vacuumed carpet or hard surface.
- Coverage approx. 50m2 per 5 litres of mixed solution, 450m2 per 5 litres of concentrate.

Thoroughly vacuum carpet and extraction clean if required (not essential) before use.

Do not mix with other products.

Always pre-test carpet for colour fastness with diluted solution before proceeding. Prohibit people and pets from the application area and wear a suitable dust mask to prevent the inhalation of spray droplets which may cause temporary irritation of the nose and throat.

Property	Value
pH	8
Fragrance	Alchoholic
Dilution	Mix 125ml per litre of water (1 to 8).
Area of Use	Carpets and surfaces where static electricity build up is an issue
CLP	irritant
How to Use	Apply diluted solution by spray applicator at low pressure (max 30psi/2bar) at the rate of 5L of solution per 5sqm. Brush product into carpet with carpet pile brush, replace furniture on protective pads, allow carpet to dry completely before re-use.
