Prochem TM3 Contra Rotating Brush Machine - Includes Renovator Trays

Variant code: 16-CA3800

Prochem TM3 is a **compact Contra Rotating Brush (CRB) carpet cleaning machine** designed for professional dry carpet maintenance, pile lifting and low-moisture cleaning applications. Engineered for use with **Prochem Fiberdri dry cleaning compound**, the TM3 provides an effective and economical solution for cleaning smaller carpeted areas and stairways without lengthy drying times.

Utilising powerful **contra-rotating brush technology**, the TM3 works cleaning compound deep into the carpet pile, loosening dirt, lifting fibres and revitalising carpet appearance. Suitable for virtually all carpet types, the machine provides excellent cleaning performance while maintaining low moisture levels, allowing cleaned areas to remain available for use almost immediately.

Its compact design and robust **stainless steel construction** make the TM3 easy to manoeuvre in confined spaces, corridors, staircases and smaller commercial environments. The machine operates with a low noise level, making it ideal for daytime cleaning in occupied buildings where disruption must be kept to a minimum.

Supplied complete with the **Renovator Tray System**, the TM3 automatically collects soiled cleaning compound during operation, streamlining the cleaning process and improving productivity. Alternatively, spent compound can be removed by vacuuming after cleaning. Combining effective cleaning, ease of use and minimal downtime, the TM3 is a valuable addition to any professional carpet maintenance programme.

Product Features

- **Compact Contra Rotating Brush (CRB) carpet cleaning machine**
- Supplied with **Renovator Trays**
- Designed for use with Prochem Fiberdri cleaning compound
- Contra-rotating brush action
- Effective dry carpet maintenance cleaning

- Low moisture cleaning system
- Pile lifting and carpet revitalisation
- Stainless steel body construction
- Compact and easy-to-manoeuvre design
- Low noise operation
- Suitable for carpeted areas and stairs

Product Benefits

- **Provides effective dry carpet cleaning with minimal downtime**
- **Lifts carpet pile and improves appearance**
- **Allows cleaning during working hours**
- Low moisture process keeps carpets dry
- Compact design ideal for smaller areas and staircases
- Low noise levels minimise disruption
- Renovator system simplifies compound collection
- Cost-effective carpet maintenance solution

Technical Characteristics

- Model: **Prochem TM3**
- Machine Type: **Contra Rotating Brush (CRB) Machine**
- Cleaning Method: Dry Compound Cleaning
- Compatible Compound: Prochem Fiberdri
- Brush System: Contra-Rotating Brushes
- Construction: Stainless Steel Body
- Noise Level: Low Noise Operation
- Included Accessories:
    - Renovator Trays
- Suitable Surface: Most Carpet Types

Applications

Prochem TM3 is ideal for **professional carpet cleaners, facilities management providers, hotels, offices, healthcare facilities, schools, care homes and commercial premises**. Suitable for **dry carpet maintenance cleaning, pile lifting, dry soil removal, low moisture cleaning, stair cleaning and interim carpet care**, it provides an efficient solution for maintaining carpet appearance and cleanliness while keeping areas operational throughout the cleaning process.
