

PU Fingertip Glove – M – Grey

Variant code: 22-A121GRRM

PU Fingertip Coated Work Gloves – Grey | Precision & Protection

Our **Grey PU Fingertip Coated Gloves** are engineered for professionals who require a "second-skin" feel for intricate tasks. By applying a high-quality **Polyurethane (PU) coating** specifically to the fingertips, these gloves offer the perfect balance of grip, breathability, and tactile sensitivity.

Designed for cleanrooms, electronics assembly, and light engineering, the grey-on-grey colourway provides a professional look while effectively hiding light dirt and dust, extending the wearable life of each pair.

Key Features & Benefits

- **Precision Grip:** The PU fingertip dip provides enhanced grip on small components, screws, and delicate parts without the bulk of a full-palm coating.
- **Maximum Breathability:** The 13-gauge seamless nylon liner allows air to circulate around the palm and back of the hand, reducing sweat and fatigue during long shifts.
- **Lint-Free & Anti-Static Properties:** Ideal for sensitive environments, these gloves minimise the risk of product contamination or static discharge.
- **Ergonomic Fit:** The elasticated knit wrist ensures a secure fit, preventing debris from entering the glove while maintaining a high range of motion.
- **Abrasion Resistant:** Despite their lightweight feel, the PU coating offers excellent resistance to nicks and scuffs.

Common Applications

These gloves are the go-to choice for industries where "feel" is everything:

- **Electronics Assembly:** Handling PCBs, microchips, and wiring.
- **Watchmaking & Jewelry:** Intricate assembly and polishing.
- **Pharmaceuticals:** Handling small vials and packaging.
- **Inspection & Quality Control:** Detecting surface imperfections by touch.
- **Automotive:** Small engine components and interior trim fitting.

Specifications

Feature	Detail
Material	13-Gauge Seamless Nylon / Polyester
Coating	Polyurethane (PU)
Coating Style	Fingertip Dip
Colour	Grey Liner / Grey Coating
Cuff Type	Elasticated Knit Wrist
Sizes Available	S, M, L, XL, XXL

Frequently Asked Questions (FAQ)

Q: Are these gloves touchscreen compatible?
A: Yes! Because the PU coating is thin and applied to the fingertips, most users find they can operate smartphones and tablets without removing the gloves.

Q: Can these gloves be washed?
A: We recommend a gentle machine wash at a low temperature (below 40°C) and air drying. Avoid high heat, as it can degrade the PU coating.

Q: How do these differ from Palm Coated PU gloves?
A: Palm-coated gloves offer more protection across the hand but can be warmer. **Fingertip-coated** gloves prioritise ventilation and are specifically designed for tasks where the palm doesn't need a heavy grip.

Q: Are they latex-free?
A: Yes, Polyurethane is a synthetic material, making these an excellent alternative for users with latex allergies.

Pro-Hints & Maintenance Tips

- **The "Pinch Test":** When sizing, ensure there is no "dead space" at the end of the

fingertips. A snug fit is essential for the precision these gloves are designed to provide.

- **Storage:** Keep your gloves in a cool, dry place away from direct sunlight. UV rays can eventually cause the PU coating to become brittle.
- **Colour Coding:** Use the grey colour to your advantage in workshops; it hides grease and carbon dust much better than white alternatives, keeping your team looking sharp.
