

PU Palm Glove – M – Black/Grey

Variant code: 22-A120K7RM

PU Palm Coated Work Gloves – Black/Grey

The **Black/Grey PU Palm Coated Glove** is the ultimate fusion of dexterity, durability, and value. Designed for precision tasks where grip and tactile sensitivity are non-negotiable, these gloves act as a second skin, protecting your hands without sacrificing the "feel" of the job.

The lightweight, seamless polyester liner provides breathable comfort for all-day wear, while the **high-quality Polyurethane (PU) coating** ensures a secure grip in both dry and slightly oily conditions. Whether you are handling small components or performing general site work, these gloves are the industry standard for reliable hand protection.

Key Features & Benefits

- **Superior Dexterity:** The thin PU coating allows for incredible fingertip sensitivity, making these perfect for intricate assembly or data entry.
- **Enhanced Grip:** The textured palm provides excellent abrasion resistance and a steady grip on tools and materials.
- **Breathable Design:** An open-back construction allows air to circulate, reducing hand fatigue and sweat buildup during long shifts.
- **Lint-Free Construction:** Ideal for sensitive environments where product contamination must be avoided (e.g., electronics or paint prep).
- **Elasticated Knit Wrist:** Ensures a snug fit to keep out dust and debris while providing a secure hold on the wrist.

Common Applications

- **Electronics & Component Assembly**

- Automotive Repair & Maintenance
- General Construction & Scaffolding
- Warehouse Picking & Packing
- Landscaping & DIY Home Improvement

Product Specifications

Feature	Detail
Material	13-Gauge Seamless Polyester Liner
Coating	Polyurethane (PU) Palm & Fingertips
Colour	Grey Liner / Black Coating (Hides dirt/grime)
Safety Rating	EN388 (Mechanical Hazards)
Washable	Yes (Hand wash recommended)

Pro-Tips & Usage Hints

- **Size Matters:** For the best "second skin" feel, ensure the glove fits snugly. A loose PU glove can snag or reduce your tactile feedback.
- **Clean Hands, Clean Work:** Because these are lint-free, they are perfect for handling glass or polished metal without leaving behind fibers or oils.
- **Storage:** Keep them out of direct sunlight when not in use. UV rays can eventually break down the polyurethane coating, reducing the glove's lifespan.

Frequently Asked Questions (FAQ)

Q: Are these gloves touchscreen compatible?A:

While not specifically marketed as "touchscreen gloves," the thin PU coating often allows for basic operation of tablets and smartphones without removing the glove.

Q: Can I wash these gloves?A: Yes. We recommend a cool hand wash and air drying. Avoid high heat (like a tumble dryer), as it can cause the PU coating to crack or peel.

Q: Are they waterproof?A: The palm coating is

water-resistant, but the back of the glove is breathable fabric. They are not suitable for submerged tasks or heavy rain.

Q: Why choose Black/Grey over White?A: The Black/Grey combination is excellent for industrial environments because it hides grease, oil, and dirt, allowing the gloves to look professional for longer.
