PVA Hygiene Screen Printed Empty Bottle - Toilet Cleaner and Descaler Bottle - 1L

Variant code: 14-CE402

PVA Hygiene Screen Printed Empty Bottle is a **dedicated toilet cleaner and descaler dosing bottle** designed for use within professional cleaning and hygiene systems. Manufactured by PVA Hygiene, a supplier focused on compliant chemical and cleaning solutions, this bottle forms part of a structured approach to safe chemical handling, dilution control and product identification within commercial environments.

The bottle is **screen printed for clear product identification**, reducing the risk of misuse and supporting COSHH-compliant storage and handling practices. It is intended for use with toilet cleaners and descalers, allowing cleaning operatives to accurately dispense and apply chemicals in washroom environments. The durable construction supports repeated use in high-frequency cleaning operations, making it suitable for facilities management, contract cleaning and institutional settings.

Designed to integrate with standard cleaning workflows, the bottle helps maintain organisation within cleaning systems while improving safety through clear labelling. It supports professional cleaning teams in maintaining consistent chemical usage and reducing the risk of cross-contamination or incorrect product application.

Product Features

- **Screen printed empty bottle** for toilet cleaner and descaler use
- Designed for professional cleaning and hygiene systems
- Clear labelling supports safe chemical identification
- Suitable for use with compatible toilet cleaning chemicals
- Durable construction for repeated commercial use
- Supports organised cleaning and chemical management systems
- Part of **PVA Hygien**e professional cleaning range

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Reduces risk of incorrect chemical usage through clear identification
- Supports COSHH-compliant storage and handling practices
- Improves efficiency in cleaning operations
- Helps maintain organised cleaning systems
- Enables controlled application of toilet cleaning chemicals
- Suitable for high-frequency commercial cleaning environments

Technical Characteristics

- Supplied empty for use with compatible cleaning chemicals
- Designed for use with toilet cleaners and descalers
- Follow site-specific dilution and labelling procedures
- Clean and rinse bottle regularly to maintain performance
- Store in designated chemical storage areas
- Ensure correct PPE is used when handling chemicals

Applications

PVA Hygiene Screen Printed Empty Bottle is intended for use in commercial washroom cleaning across sectors such as facilities management, healthcare, education, hospitality and public buildings. It is particularly suited to environments where multiple cleaning chemicals are used and clear identification is required to maintain safety and compliance. The bottle supports structured cleaning systems by enabling accurate dispensing of toilet cleaners and descalers while helping reduce the risk of misuse in busy, high-traffic environments.
