PVA Hygiene Glass and Stainless Steel Cleaner Screen Printed Empty Trigger Spray Bottle - Surface Cleaner Bottle - 750ml

Variant code: 14-CE541

PVA Hygiene Glass and Stainless Steel Cleaner Screen Printed Empty Trigger Spray Bottle is a **dedicated surface cleaner dispensing bottle** designed for professional cleaning environments where clarity, finish quality and chemical control are essential. Manufactured by PVA Hygiene, a brand focused on structured cleaning systems and compliant chemical handling, this bottle supports safe and efficient application of glass and stainless steel cleaning solutions.

The bottle is **screen printed for glass and stainless steel cleaner use**, providing clear product identification and helping reduce the risk of chemical misuse. It is intended for use with compatible cleaning concentrates or ready-to-use solutions, allowing operatives to apply cleaning products accurately across reflective and polished surfaces. The trigger spray mechanism enables controlled, even distribution, making it suitable for achieving streak-free finishes on glass, mirrors and stainless steel fixtures.

Designed for durability and repeated use, the bottle integrates into existing cleaning workflows and supports COSHH-compliant labelling systems. Its clearly defined purpose makes it suitable for use within colour-coded or area-specific cleaning processes, helping maintain hygiene standards and prevent cross-contamination between cleaning zones.

Product Features

- **Screen printed bottle for glass and stainless steel cleaner use**
- Designed for professional cleaning and hygiene systems
- Trigger spray head for controlled and even application
- Suitable for use with compatible cleaning solutions
- Supports accurate chemical identification and usage

- Durable construction for repeated commercial use
- Manufactured by **PVA Hygiene**

Product Benefits

- Reduces risk of incorrect chemical usage
- Supports COSHH-compliant storage and handling practices
- Enables controlled application for streak-free cleaning results
- Improves efficiency in cleaning reflective and polished surfaces
- Helps maintain organised cleaning systems
- Suitable for high-frequency commercial cleaning environments

Technical Characteristics

- Supplied empty for use with compatible cleaning chemicals
- Designed for trigger spray application
- Suitable for dilution or ready-to-use solutions
- Clean and rinse regularly to maintain performance
- Store in designated chemical storage areas
- Follow site-specific cleaning and safety procedures

Applications

PVA Hygiene Glass and Stainless Steel Cleaner Screen Printed Empty Trigger Spray Bottle is suitable for use across commercial cleaning, hospitality, healthcare and facilities management environments. It is particularly effective in areas requiring high visual standards, such as reception areas, kitchens, washrooms and public spaces. The bottle supports efficient cleaning of glass panels, mirrors, stainless steel appliances and fixtures, helping maintain a clean, polished appearance while ensuring safe and consistent chemical application.
