PVA Hygiene Glass and Stainless Steel Cleaner Soluble Sachets - Surface Cleaner Concentrate - Pack of 20

Variant code: 07-B520S

PVA Hygiene Glass and Stainless Steel Cleaner Soluble Sachets are a **concentrated cleaning solution** designed for use with trigger spray bottles in professional cleaning environments where surface clarity and finish are critical. Manufactured by PVA Hygiene, a supplier focused on structured chemical systems and compliant hygiene solutions, these sachets support accurate dosing, consistent results and efficient chemical management across commercial cleaning operations.

Each sachet is **pre-measured for controlled dilution**, with **1 sachet designed to produce 750ml of ready-to-use solution** when mixed with water in a trigger spray bottle. This system eliminates manual measuring, helping reduce dosing errors while maintaining consistent cleaning performance across teams. The formulation is **specially developed to clean and revitalise glass and stainless steel surfaces**, delivering a **smear-free finish with a refreshing fragrance**, making it suitable for environments where visual presentation is important.

The compact sachet format supports efficient storage and reduces packaging compared to traditional liquid products. Designed for integration into professional cleaning systems, it enables operatives to maintain high standards while supporting COSHH-compliant processes and safe chemical handling.

Product Features

- **Pre-measured soluble sachets** for glass and stainless steel cleaning
- **1 sachet per 750ml trigger spray bottle** for consistent dilution
- Formulated to clean and revitalise reflective and polished surfaces
- Delivers a **smear-free finish with a refreshing fragrance**
- Designed for use with trigger spray

bottles
- Eliminates need for manual chemical measuring
- Manufactured by **PVA Hygiene**

Product Benefits

- Ensures consistent dilution and cleaning performance
- Reduces risk of incorrect chemical dosing
- Helps maintain clean, streak-free and presentable surfaces
- Supports COSHH-compliant handling and safety procedures
- Improves efficiency in cleaning glass and stainless steel areas
- Reduces storage space and packaging compared to liquid formats

Technical Characteristics

- Designed to dissolve fully in water before use
- Use **1 sachet per 750ml trigger spray bottle**
- Compatible with standard trigger spray systems
- Store in a dry environment prior to use
- Avoid exposure to moisture before application
- Dispose of packaging in accordance with local regulations

Applications

PVA Hygiene Glass and Stainless Steel Cleaner Soluble Sachets are suitable for use in commercial cleaning, hospitality, healthcare and facilities management environments. They are particularly effective in areas requiring high visual standards, such as reception areas, kitchens, washrooms and public spaces. The formulation supports the cleaning of glass panels, mirrors and stainless steel fixtures, helping maintain a polished appearance while delivering consistent, smear-free results in high-use environments.
