PVA Hygiene Hard Surface Aqua Multipurpose Soluble Sachets - Surface Cleaner Concentrate - Aqua - Box of 150

Variant code: 07-A3150S

PVA Hygiene Hard Surface Aqua Multipurpose Cleaner Soluble Sachets are a **concentrated surface cleaning solution** designed for use with trigger spray bottles in professional cleaning environments. Manufactured by PVA Hygiene, a supplier known for structured chemical systems and compliant hygiene solutions, these sachets support accurate dosing, consistent cleaning performance and efficient chemical management across commercial operations.

Each sachet is **pre-measured for controlled dilution**, allowing operatives to create a ready-to-use solution quickly and consistently without manual measuring. Designed for use with trigger spray bottles, the system enables efficient application across a wide range of hard surfaces, including desks, fixtures, fittings and general interior surfaces. The formulation is suitable for routine cleaning tasks where flexibility and consistent results are required.

The **aqua colour coding** supports structured cleaning systems, helping teams identify the correct product for designated areas and reduce the risk of cross-contamination. The compact sachet format improves storage efficiency and reduces packaging compared to traditional liquid products, while supporting COSHH-compliant handling procedures.

Product Features

- **Pre-measured soluble sachets** for multipurpose surface cleaning
- Designed for use with trigger spray bottles
- Produces ready-to-use cleaning solution when diluted
- Suitable for a wide range of hard surfaces
- **Aqua colour coding** for system identification and hygiene control
- Eliminates need for manual chemical measuring

- Manufactured by **PVA Hygiene**

Product Benefits

- Ensures consistent dilution and cleaning performance
- Reduces risk of incorrect chemical dosing
- Supports organised and colour-coded cleaning systems
- Improves efficiency in general cleaning tasks
- Helps maintain hygiene standards across multiple areas
- Reduces storage space and packaging requirements

Technical Characteristics

- Designed to dissolve fully in water before use
- Compatible with standard trigger spray bottle systems
- Follow manufacturer dilution instructions
- Store in a dry environment prior to use
- Avoid exposure to moisture before application
- Dispose of packaging in accordance with local regulations

Applications

PVA Hygiene Hard Surface Aqua Multipurpose Cleaner Soluble Sachets are suitable for use in commercial cleaning, facilities management, healthcare, education and hospitality environments. They are particularly effective for routine cleaning of desks, fixtures, fittings and general hard surfaces in offices, public areas and shared spaces. The aqua colour coding supports structured cleaning systems, helping maintain hygiene standards and consistency in high-traffic environments.
