PVA Hygiene Kitchen Degreaser Soluble Sachets - Surface Degreaser Concentrate - Pack of 20

Variant code: 07-B320S

PVA Hygiene Kitchen Degreaser Soluble Sachets are a **concentrated degreasing solution** designed for use with trigger spray bottles in professional kitchen and food preparation environments. Manufactured by PVA Hygiene, a supplier known for structured chemical systems and compliant hygiene solutions, these sachets support accurate dosing, consistent performance and safe chemical handling across commercial cleaning operations.

Each sachet is **pre-measured for controlled dilution**, with **1 sachet designed for use per 750ml trigger spray bottle** to produce a ready-to-use solution. The formulation is a **powerful degreaser designed to clean and degrease a wide range of surfaces**, including general floors, walls, tiles and catering surfaces. It is suitable for environments where grease, oil and food residue are commonly present, supporting efficient cleaning in demanding conditions.

The solution **requires no rinsing**, helping improve cleaning efficiency and reduce downtime in busy kitchen environments. It also features a **non-tainting fragrance**, making it suitable for use in food preparation areas where hygiene and safety standards must be maintained. The compact sachet format improves storage efficiency and reduces packaging compared to traditional liquid degreasers, while supporting COSHH-compliant handling procedures.

Product Features

- **Pre-measured soluble sachets** for kitchen degreasing
- **1 sachet per 750ml trigger spray bottle** for consistent dilution
- Powerful formulation for cleaning and degreasing multiple surfaces
- Suitable for floors, walls, tiles and catering surfaces
- **No rinse formulation** for improved efficiency
- **Non-tainting fragrance** suitable for food preparation areas

- Manufactured by **PVA Hygiene**

Product Benefits

- Ensures consistent dilution and degreasing performance
- Reduces risk of incorrect chemical dosing
- Improves efficiency with no rinsing required
- Supports hygiene standards in food preparation environments
- Enables safe use in catering areas without affecting food safety
- Reduces storage space and packaging compared to liquid products

Technical Characteristics

- Designed to dissolve fully in water before use
- Use **1 sachet per 750ml trigger spray bottle**
- Compatible with standard trigger spray systems
- Store in a dry environment prior to use
- Avoid exposure to moisture before application
- Dispose of packaging in accordance with local regulations

Applications

PVA Hygiene Kitchen Degreaser Soluble Sachets are suitable for use in commercial kitchens, catering environments, hospitality settings and food preparation areas. They are particularly effective for removing grease and oil build-up from worktops, walls, floors, tiles and equipment surfaces. The trigger spray system allows controlled and targeted application, supporting efficient cleaning workflows and maintaining hygiene standards in high-traffic kitchen environments.
