PVA Toilet Cleaner and Descaler Sachets for 1 Litre Bottle - Pack of 12

Variant code: 07-A812S

PVA Hygiene Toilet Cleaner and Descaler Soluble Sachets are a **concentrated washroom cleaning solution** designed for use with 1 litre trigger or dosing bottles in professional cleaning environments. Manufactured by PVA Hygiene, a supplier known for structured chemical systems and compliant hygiene solutions, these sachets support accurate dilution, consistent performance and safe chemical handling in commercial washroom cleaning operations.

Each sachet is **pre-measured for controlled dilution**, designed specifically for use with a **1 litre bottle to create a ready-to-use solution**. This eliminates the need for manual measuring, reducing the risk of incorrect dosing while ensuring consistent results across cleaning teams. The formulation is developed to clean and descale toilet bowls and urinals, targeting limescale, mineral deposits and general washroom soiling.

The compact sachet format improves storage efficiency and reduces packaging compared to traditional liquid products. By standardising dilution, the system supports COSHH-compliant processes and helps maintain organised cleaning systems. It integrates easily into routine cleaning workflows and is suitable for high-frequency washroom maintenance where reliability and efficiency are essential.

Product Features

- **Pre-measured soluble sachets** for toilet cleaning and descaling
- Designed for use with **1 litre bottles** for consistent dilution
- Produces ready-to-use cleaning solution when dissolved
- Targets limescale, mineral deposits and washroom soiling
- Suitable for toilet bowls and urinals
- Eliminates need for manual chemical measuring
- Manufactured by **PVA Hygiene**

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Ensures consistent dilution and cleaning performance
- Reduces risk of incorrect chemical dosing
- Supports effective removal of limescale and build-up
- Improves efficiency in washroom cleaning tasks
- Supports COSHH-compliant handling and safety procedures
- Reduces storage space and packaging waste

Technical Characteristics

- Designed to dissolve fully in water before use
- Use one sachet per **1 litre bottle**
- Suitable for trigger spray or dosing bottle systems
- Follow manufacturer dilution and application instructions
- Store in a dry environment prior to use
- Dispose of packaging in accordance with local regulations

Applications

PVA Hygiene Toilet Cleaner and Descaler Soluble Sachets are suitable for use in commercial washrooms across sectors including facilities management, healthcare, education, hospitality and public buildings. They are particularly effective for routine cleaning and descaling of toilet bowls and urinals in high-traffic environments. The sachet system supports efficient cleaning workflows, helping maintain hygiene standards and consistent results in washroom maintenance programmes.
